Summary Prospectus

June 29, 2018

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus, Statement of Additional Information and other information about the Fund online at <http://www.muzinichusfunds.com/literature.html>. You may also obtain this information at no cost by calling 1-855-MUZINICH or by e-mail at MuzinichUSFunds@muzinich.com. The Fund's Prospectus and Statement of Additional Information, both dated April 30, 2018, as supplemented, are incorporated by reference into this Summary Prospectus.

Investment Objective

The Muzinich U.S. High Yield Corporate Bond Fund (the "U.S. High Yield Fund" or the "Fund") seeks to provide a high level of income on a risk-adjusted basis over a full market cycle.

Fees and Expenses

The following table describes the fees and expenses that you may pay if you buy and hold shares of the U.S. High Yield Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$100,000 in the Fund. More information about these and other discounts is available from your financial professional and under "Choosing a Share Class" on Page 50 of the Prospectus and "Additional Purchase and Redemption Information" on Page 40 of the SAI.

Shareholder Fees <i>(fees paid directly from your investment)</i>	Class A	Institutional	Supra Institutional
Maximum Front End Sales Charge	4.25%	None	None
Redemption Fee <i>(as a % of amount redeemed within 90 days of purchase)</i>	1.00%	1.00%	1.00%

Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	Class A	Institutional	Supra Institutional
Management Fees	0.55%	0.55%	0.55%
Distribution and/or Service (12b-1) Fees	0.25%	None	None
Other Expenses ⁽¹⁾⁽²⁾	0.58%	1.06%	0.48%
Shareholder Servicing Fees <i>(up to 0.10% for Class A and Institutional Class shares)</i>	<u>0.10%</u>	<u>0.07%</u>	<u>N/A</u>
Acquired Fund Fees and Expenses	<u>0.03%</u>	<u>0.03%</u>	<u>0.03%</u>
Total Annual Fund Operating Expenses	1.41%	1.64%	1.06%
Fee Waiver and/or Expense Reimbursement	<u>-0.45%</u>	<u>-0.93%</u>	<u>-0.45%</u>
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement ⁽³⁾⁽⁴⁾	<u>0.96%</u>	<u>0.71%</u>	<u>0.61%</u>

(1) Other expenses for Class A shares are based on estimated amounts for the current fiscal year.

(2) Other expenses for Institutional Class shares were significantly higher than the Supra Institutional Class shares due to the fact that the Institutional Class commenced operations on March 27, 2017 and the Institutional Class shares had not experienced sufficient asset growth during this reporting period.

(3) The Advisor has contractually agreed to waive its fees and reimburse certain expenses (excluding taxes, leverage interest, interest on short positions, portfolio transaction expenses, acquired fund fees and expenses and extraordinary expenses) to limit Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement for Class A Shares, Institutional Shares and Supra Institutional Shares to 0.93%, 0.68% and 0.58%, respectively, of the U.S. High Yield Fund's average daily net assets indefinitely, but at least through April 30, 2019 (the "Expense Caps"). The Expense Caps may be changed or eliminated at any time after April 30, 2019, by the Board of Trustees upon 60 days' prior written notice to the Advisor, or by the Advisor with the consent of the Board of Trustees. The Advisor is permitted, with Board approval, to be reimbursed for fee reductions and/or expense payments made in the prior three years. This reimbursement may be requested if the aggregate amount actually paid by the Fund toward operating expenses for such period (taking into account any reimbursement) does not exceed the lesser of the Expense Cap in place at the time of the waiver or at the time of reimbursement.

(4) The Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement do not correlate to the Ratio of Expenses to Average Net Assets after Fees Waived provided in the Financial Highlights section of the Fund's audited financial statements for the period ended December 31, 2017, which reflect the operating expenses of the Fund and does not include Acquired Fund Fees and Expenses.

Example

The Example below is intended to help you compare the cost of investing in the U.S. High Yield Fund with the cost of investing in other mutual funds. This Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of each period. The Example also assumes that your investment has a 5% annual return each year and that the Fund's operating expenses remain the same (taking into account the Expense Caps in the first year only). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$519	\$810	\$1,122	\$2,007
Institutional Shares	\$ 73	\$426	\$ 804	\$1,865
Supra Institutional Shares	\$ 62	\$292	\$ 541	\$1,253

Portfolio Turnover

The U.S. High Yield Fund pays transaction costs, such as commissions or spreads, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. For the fiscal year ended December 31, 2017, the Fund's portfolio turnover rate was 120% of the average value of its portfolio.

Principal Investment Strategies

The U.S. High Yield Fund normally invests at least 80% of its net assets in high yield bonds of U.S. corporations (commonly referred to as "junk" bonds). The Fund's portfolio is typically well-diversified with below investment grade bonds issued by U.S. corporations that the Advisor believes have attractive risk/reward characteristics. The Fund typically focuses on bonds rated below investment grade, defined as below BBB- or Baa3 by Standard & Poor's or Moody's, respectively, or which are deemed equivalent by the Advisor. High yield bonds in which the Fund invests may be unsecured or backed by receivables or other assets. The Fund may invest up to 20% of its net assets in foreign securities, of which 10% may include securities in emerging market countries. The Fund may also invest up to 20% of its net assets in bank loans, including floating rate loans. The Fund may invest in mutual funds (including affiliated mutual funds) or exchange-traded funds ("ETFs") which invest in any of the previously mentioned types of fixed income securities and such investments in bond ETFs will be included in the Fund's 80% test.

Although the Advisor will consider ratings assigned by ratings agencies in selecting high yield bonds, it relies principally on its own research and investment analysis. The Advisor selects bonds based on a rigorous bottom-up evaluation of each company in the portfolio. The Advisor considers both company-specific quantitative and qualitative factors such as: a company's managerial strength and commitment to debt repayment, anticipated cash flow, debt maturity schedules, borrowing requirements, use of borrowing proceeds, asset coverage, earnings prospects, impacting legislation, regulation, or litigation, and the strength and depth of the protections afforded the lender through the documentation governing the bond issuance. The Fund typically invests in highly leveraged companies.

The Advisor does not manage the Fund to any particular duration. Rather, the securities within the Fund's portfolio are consistent with general market duration, averaging between two to four years at any point in time. (Duration is a measure of the expected life of a fixed income security that is used to determine the sensitivity of a security's price to changes in interest rates.)

The mutual funds and ETFs in which the Fund invests have an investment objective similar to that of the Fund or are otherwise permitted investments in accordance with the Fund's investment policies described herein.

The Fund may use derivatives in various ways. The Fund may use derivatives as a substitute for taking a long or short position in the reference asset or to gain exposure to certain asset classes; under such circumstances, the derivatives may have economic characteristics similar to those of the reference asset, and the Fund's investment in the derivatives may be applied toward meeting a requirement to invest a certain percentage of its net assets in instruments with such characteristics. The Fund may use derivatives to hedge (or reduce) its exposure to a portfolio asset or risk. The Fund may also use derivatives to manage cash. By investing in derivatives, the Fund attempts to achieve the economic equivalence it would achieve if it were to invest directly in the underlying security.

The portfolio is actively managed and the Fund may sell a holding when it meets the portfolio managers' expectations, no longer offers compelling relative value, shows deteriorating fundamentals, or if it falls short of the portfolio managers' expectations. Trading securities frequently may lead to high portfolio turnover. Tax consequences are not a primary consideration in the Fund's investment decisions. Although the Fund will not invest in bonds or loans that are already in default, the portfolio managers may decide to continue to hold a bond or loan (or related securities) after a default. There is no limit on the amount of defaulted securities the Fund may hold.

Principal Investment Risks

As with all mutual funds, there is the risk that you could lose all or a portion of your investment in the U.S. High Yield Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following are the principal risks that could affect the value of your investment:

- **Active Management Risk** – The U.S. High Yield Fund is actively managed with discretion and may underperform market indices or other funds.
- **Below Investment Grade Securities (Junk Bond) Risk** – The U.S. High Yield Fund's investment in below-investment grade bonds, loans or other fixed-income securities (*i.e.*, high yield or junk) exposes the Fund to a greater risk of loss of principal and income than a fund that invests solely or primarily in investment grade bonds or loans or other similarly rated debt securities. High-yield securities are considered to

be predominantly speculative with respect to the issuer's capacity to pay interest and repay principal. If there is a "flight to safety," the market's perception of "high yield" securities may turn negative, and these types of securities may become perceived as "high risk."

- **Counterparty Risk** – Counterparty risk arises upon entering into borrowing arrangements and is the risk from the potential inability of counterparties to meet the terms of their contracts. If the counterparty defaults, the U.S. High Yield Fund's loss will generally consist of the net amount of contractual payments that the Fund has not yet received, though the Fund's maximum risk due to counterparty credit risk could extend to the notional amount of the contract should the underlying asset on which the contract is written have no offsetting market value. The "notional value" is generally defined as the value of the derivative's underlying assets at the spot price. The Fund could be exposed to increased leverage risk should it finance derivative transactions without holding cash or cash equivalents equal to the notional value of its derivative positions.
- **Credit Risk** – The risk that an issuer of a fixed income security will fail to make interest payments or repay principal when due, in whole or in part. Changes in an issuer's financial strength or in a security's credit rating may affect a security's value. High yield bonds and other types of high yield debt securities have greater credit risk than higher quality debt securities because the companies that issue them are not as financially strong as companies with investment grade ratings and may be highly leveraged.
- **Currency Risk and Hedging Risk** – The U.S. High Yield Fund will endeavor to limit price fluctuations caused by the changing relative value of currencies in which the Fund invests, but hedging involves costs and there can be no assurance that the Fund will be perfectly hedged or that the hedging will work as anticipated.
- **Derivatives Risk** – The risk that an investment in derivatives will not perform as anticipated, cannot be closed out at a favorable time or price, or will increase the Fund's volatility; that derivatives may create investment leverage; that, when a derivative is used as a substitute or alternative to a direct cash investment, the transaction may not provide a return that corresponds precisely with that of the cash investment; that a derivative will not perform in the manner anticipated by the Advisor; or that, when used for hedging purposes, derivatives will not provide the anticipated protection, causing the Fund to lose money on both the derivatives transaction and the exposure the Fund sought to hedge.
- **Extension Risk** – Some fixed income securities are subject to the risk that the fixed income security's effective maturity is extended because calls or prepayments are less or slower than anticipated, particularly when interest rates rise. The market value of such security may then decline and become more interest rate sensitive.
- **Foreign Securities and Emerging Markets Risk** – Non-U.S. securities carry their own risks. Investments in foreign securities involve certain risks not associated with investments in U.S. companies. Foreign securities in the Fund's portfolio subject the Fund to the risks associated with investing in the particular country, including the political, regulatory, economic, social and other conditions or events occurring in the country, as well as fluctuations in its currency and the risks associated with less developed custody and settlement practices. Emerging markets involve greater risk and volatility than more developed markets. Some emerging markets countries may have fixed or managed currencies that are not free-floating against the U.S. dollar. It can be more difficult to enforce liens on collateral for securities purchased in some foreign jurisdictions, including some emerging market jurisdictions.
- **Market and Regulatory Risk** – Events in the financial markets and economy may cause volatility and uncertainty and adversely impact the Fund's performance. Market events may affect a single issuer, industry, sector, or the market as a whole. Traditionally liquid investments may experience periods of diminished liquidity. Governmental and regulatory actions, including tax law changes, may also impair portfolio management and have unexpected or adverse consequences on particular markets, strategies, or investments.
- **Impairment of Collateral Risk** – The value of any collateral securing a bond or loan can decline, and may be insufficient to meet the borrower's obligations or be difficult to liquidate. In addition, the U.S. High Yield Fund's access to collateral may be limited by bankruptcy or other insolvency laws.
- **Interest Rate Risk** – When interest rates rise, prices of fixed income securities generally fall and when interest rates fall, prices of fixed income securities generally rise. Given that the Federal Reserve has begun to raise interest rates, the Fund may face a heightened level of interest rate risk. In general, fixed income securities with longer maturities or durations are more sensitive to interest rate changes.
- **Investment Company and ETF Risk** – Investing in other investment companies, including ETFs, involves the risk that the other investment company or ETF will not achieve its investment objective or execute its investment strategy effectively or that large purchase or redemption activity by shareholders of such an investment company might negatively affect the value of the investment company's shares. Additionally, the Fund must pay its pro rata portion of an investment company's fees and expenses. (Affiliated mutual funds will not charge duplicate fees and expenses.) Finally, other investment companies and ETFs will have similar underlying risks as the Fund, including credit risk, liquidity risk and management risk.
- **Issuer Risk** – An issuer may perform poorly, and therefore, the value of its securities may decline, which would negatively affect the U.S. High Yield Fund's performance.
- **Liquidity Risk** – High yield fixed income securities tend to be less liquid than higher quality fixed income securities, meaning that it may be difficult to sell high yield fixed income securities at a reasonable price. The U.S. High Yield Fund may have to lower the selling price, sell other investments, or forgo another, more appealing investment opportunity. Additionally, floating rate loans generally are subject to legal or contractual restrictions on resale, may trade infrequently, and their value may be impaired when the Fund needs to liquidate such loans. Loans and other securities may trade only in the over-the-counter market rather than on an organized exchange and may be more difficult to purchase or sell at a fair price, which may have a negative impact on the Fund's performance.
- **Newer Fund Risk** – The Fund is newer with limited operating history and there can be no assurance that the Fund will grow to or maintain an economically viable size.

- **Portfolio Turnover Risk** – High portfolio turnover involves correspondingly greater expenses to the Fund, including brokerage commissions or dealer mark-ups and other transaction costs on the sale of securities and reinvestments in other securities, which may result in adverse tax consequences to the Fund’s shareholders.
- **Prepayment Risk** – Prepayment risk occurs when a fixed income security can be repaid in whole or in part prior to the security’s maturity and the U.S. High Yield Fund must reinvest the proceeds it receives, during periods of declining interest rates, in securities that pay a lower rate of interest. Also, if a security has been purchased at a premium, the value of the premium would be lost in the event of prepayment. Prepayments generally increase when interest rates fall.
- **Ratings Agencies Risk** – The ratings of securitized assets may not adequately reflect the credit risk of those assets due to their structure. Rating agencies may fail to make timely changes in credit ratings and an issuer’s current financial condition may be better or worse than a rating indicates. In addition, rating agencies are subject to an inherent conflict of interest because they are often compensated by the same issuers whose securities they grade.
- **Redemption Risk** – The Fund may experience periods of heavy redemptions that could cause the Fund to sell assets at inopportune times or at a loss or depressed value. Redemption risk is heightened during periods of declining or illiquid markets. Heavy redemptions could hurt the Fund’s performance. A general rise in interest rates, perhaps because of changing government policies, has the potential to cause investors to move out of fixed income securities on a large scale, which may increase redemptions from mutual funds that hold large amounts of fixed income securities. Such a move, coupled with a reduction in the ability or willingness of dealers and other institutional investors to buy or hold fixed income securities, may result in decreased liquidity and increased volatility in the fixed income markets.
- **Restricted Securities Risk** – Restricted securities may not be listed on an exchange and may have no active trading market. Restricted securities may be illiquid, and the Fund may be unable to sell them at a time when it may otherwise be desirable to do so or may be able to sell them only at prices that are less than what the Fund regards as their fair market value. Transaction costs may be higher for restricted securities. In addition, the Fund may get only limited information about the issuer of a restricted security.
- **Senior (Floating Rate, Bank, Leveraged, Syndicated) Loan Risk** – The Fund may invest in senior loans which include interests in loans to companies or their affiliates undertaken for various purposes. These loans, which may bear fixed or floating rates, have generally been arranged through private negotiations between a company and one or more financial institutions, including banks. Bank loans may not be securities and therefore may not have the protection afforded by federal securities laws. The Fund’s investment may be in the form of participation in loans or of assignments of all or a portion of loans from third parties. Investments in senior loans involves credit risk, interest rate risk, liquidity risk and other risks, including the risk that it may take more than seven days to settle any loan transaction, the risk that any collateral may become impaired, and the risk that the Fund may obtain less than the full value for the loan interests when sold. The Fund has the power to engage in short term borrowing to meet short-term liquidity needs that might arise from any lengthy loan settlement periods.
- **U.S. Government Securities Risk** – Although the Fund may hold securities that carry U.S. government guarantees, these guarantees do not extend to shares of the Fund itself and do not guarantee the market prices of the securities. Furthermore, not all securities issued by the U.S. government and its agencies and instrumentalities are backed by the full faith and credit of the U.S. Treasury.

Performance Information

The following performance information provides some indication of the risks of investing in the Fund. The bar chart shows changes in the Fund’s performance for its first full calendar year for the Supra Institutional Class. The table below illustrates how the Fund’s average annual total returns for the 1-year and since inception period compared with that of a broad-based securities index. The Fund’s past performance (before and after taxes) is not necessarily an indication of how it will perform in the future. Updated performance information is available on the Fund’s website at www.MuzinichUSFunds.com, by calling the Fund toll-free at 1-855-MUZINICH (1-855-689-4642) or by e-mailing the Fund at MuzinichUSFunds@muzinich.com.

Calendar Year Total Return as of December 31 – Supra Institutional Class

Highest Quarterly Return:	Q2 2017	2.29%
Lowest Quarterly Return:	Q4 2017	0.26%

Average Annual Total Return as of December 31, 2017

	1 Year	Since Inception (03/31/2016)
Supra Institutional Class		
Return Before Taxes	6.30%	8.05%
Return After Taxes on Distributions	1.07%	4.19%
Return After Taxes on Distributions and Sale of Fund Shares	3.65%	4.45%
Institutional Class – Return Before Taxes	N/A	5.47%
ICE Bank of America Merrill Lynch BB-B Cash Pay High Yield Constrained Index (reflects no deduction for fees, expenses or taxes)	6.98%	10.42%

Institutional Class shares commenced operations on March 27, 2017.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and does not reflect the impact of state and local taxes. Actual after-tax returns depend on your situation and may differ from those shown. Furthermore, the after-tax returns shown are not relevant to those who hold their shares through tax-deferred arrangements such as 401(k) plans or Individual Retirement Accounts (“IRAs”). After-tax returns are shown only for Supra Institutional Class and after-tax returns for other classes will differ. Performance for the Institutional Class shares reflects the performance of the Supra Institutional Class shares adjusted for Institutional Class shares expenses.

Management

Investment Advisor	Portfolio Managers

	Bryan Petermann, MBA, Portfolio Manager Managed the Fund since commencement of operations in March 2016

Purchase and Sale of Fund Shares

You may purchase, exchange or redeem U.S. High Yield Fund shares on any business day by written request via mail (Muzinich U.S. High Yield Corporate Bond Fund, c/o U.S. Bancorp Fund Services, LLC, P.O. Box 701, Milwaukee, WI 53201-0701), by wire transfer, or by telephone at 1-855-MUZINICH (toll free). Investors who wish to purchase, exchange or redeem Fund shares through a broker-dealer should contact the broker-dealer directly. The minimum initial and subsequent investment amounts for various types of accounts are shown below.

Type of Account	Minimum Initial Investment	Minimum Additional Investment
Class A Shares		
– Standard Accounts	\$10,000	\$100
– Traditional and Roth IRAs	\$500	\$100
– Accounts with Automatic Investment Plans	\$500	\$100
Institutional Shares		
– Standard Accounts	\$1,000,000	\$100
– Qualified Retirement Plans	\$10,000	\$100
Supra Institutional Shares		
– Standard Accounts	\$5,000,000	\$100
– Qualified Retirement Plans	\$50,000	\$100

Tax Information

The U.S. High Yield Fund’s distributions are taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement that does not use borrowed funds, such as a 401(k) plan or an individual retirement account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the U.S. High Yield Fund through a broker-dealer or other financial intermediary (such as a fund-supermarket), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
