**Supplement dated November 1, 2018 to the
Statement of Additional Information (“SAI”)
dated April 30, 2018, as supplemented**

Effective November 1, 2018, Kathleen T. Barr has been appointed by the Board of Trustees of Professionally Managed Portfolios (the “Trust”) to serve as an Independent Trustee for the Trust. Accordingly, the following sections have been revised to include her information.

The Trustee table on page 22 of the SAI has been revised to include the following:

Name, Address And Age	Position with the Trust	Term of Office and Length of Time Served	Principal Occupation During Past Five Years	Number of Portfolios in Fund Complex⁽²⁾ Overseen by Trustees	Other Directorships Held During the Past 5 Years
Independent Trustees of the Trust⁽¹⁾					
Kathleen T. Barr (born 1955) c/o U.S. Bank Global Fund Services 2020 E. Financial Way Suite 100 Glendora, CA 91741	Trustee	Indefinite Term Since November 2018.	Former owner of a registered investment adviser (Productive Capital Management, Inc.), Chief Administrative Officer, Senior Vice President and Senior Managing Director of Allegiant Asset Management Company (merged with PNC Capital Advisers LLC in 2009), Chief Administrative Officer, Chief Compliance Officer and Senior Vice President of PNC Funds and PNC Advantage Funds (f/k/a Allegiant Funds).	4	Independent Trustee for the William Blair Funds (2013 to present); Independent Trustee for the AmericaFirst Quantitative Funds (2012 to 2016).

The Trustee Attributes on page 25 of the SAI have been revised to include the following:

Ms. Barr’s Trustee Attributes include her substantial mutual fund experience, including her role as a member of the Governing Council for the Independent Directors Council and its Executive Committee. She has executive experience as the former owner of a registered investment adviser (Productive Capital Management, Inc.), as the Chief Administrative Officer, Senior Vice President and Senior Managing Director of Allegiant Asset Management Company (merged with PNC Capital Advisers LLC in 2009), and as the Chief Administrative Officer, Chief Compliance Officer and Senior Vice President of PNC Funds and PNC Advantage Funds (f/k/a Allegiant Funds). Ms. Barr also currently serves on the board of another registered investment management company. Ms. Barr has been determined to qualify as an Audit Committee financial expert for the Trust. The Board believes Ms. Barr’s experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees led to the conclusion that she possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

The Trustee Ownership table on page 27 of the SAI has been revised as follows:

Name	Dollar Range of Credit Opportunities Fund Shares	Dollar Range of High Yield Fund Shares	Dollar Range of Low Duration Fund Shares	Aggregate Dollar Range of Fund Shares in the Trust
Kathleen T. Barr	None	None	None	Over \$100,000
Dorothy A. Berry	None	None	None	\$50,001-\$100,000
Wallace L. Cook	None	None	None	Over \$100,000
Eric W. Falkeis	Over \$100,000	None	None	Over \$100,000
Carl A. Froebel	None	None	None	Over \$100,000
Steven J. Paggioli	None	None	None	Over \$100,000

The Trustee Compensation Table on page 28 of the SAI has been revised as follows:

Name of Person/Position	Credit Opportunities Fund	U.S. High Yield Fund ⁽²⁾	Low Duration Fund	Floating Rate Fund ⁽²⁾	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from Fund and Fund Complex ⁽¹⁾ Paid to Trustees
Kathleen T. Barr, Trustee ⁽³⁾	None	None	None	None	None	None	None
Dorothy A. Berry, Trustee	\$3,777	\$2,910	\$3,952	None	None	None	\$10,639
Wallace L. Cook, Trustee	\$3,127	\$2,259	\$3,302	None	None	None	\$8,688
Eric W. Falkeis, Trustee	\$3,127	\$2,259	\$3,302	None	None	None	\$8,688
Carl A. Froebel, Trustee	\$3,127	\$2,259	\$3,302	None	None	None	\$8,688
Steve J. Paggioli, Trustee	\$3,127	\$2,259	\$3,302	None	None	None	\$8,688

(1) There are currently numerous portfolios comprising the Trust. The term "Fund Complex" applies only to the Funds. For the fiscal year ended December 31, 2017, cumulative Trustees' fees and expenses were received in the amount of \$645,000.

(2) There was no compensation for the Floating Rate Fund for the fiscal year ended December 31, 2017, since the Fund had not commenced operations prior to the fiscal year end.

(3) Kathleen T. Barr was appointed as an independent trustee to the Trust effective November 1, 2018, accordingly, she did not receive any compensation from the Fund(s) during the fiscal period/year ended December 31, 2017.

Please retain this Supplement with your SAI.

This Statement of Additional Information (the “SAI”) provides additional information to the Prospectuses dated April 30, 2018, as may be amended from time to time, of the Muzinich Credit Opportunities Fund, Muzinich U.S. High Yield Corporate Bond Fund, Muzinich Low Duration Fund, and Muzinich High Income Floating Rate Fund (each, a “Fund,” and collectively, the “Funds”), each a series of Professionally Managed Portfolios, a registered, open-end management investment company (the “Trust”). This SAI is not a prospectus and should only be read in conjunction with the Prospectuses. You may obtain the Prospectuses without charge by contacting U.S. Bancorp Fund Services, LLC at the address or telephone number listed above or by visiting the Funds’ website at www.MuzinichUSFunds.com.

The Funds’ most recent Annual Report to shareholders is available, without charge, upon request by calling the number listed above. The financial statements, accompanying notes and report of independent registered public accounting firm appearing in the Annual Report are incorporated into this SAI by reference to the Funds’ Annual Report dated December 31, 2017, as filed with the U.S. Securities and Exchange Commission (“SEC”). The Muzinich U.S. High Yield Corporate Bond Fund commenced operations on March 31, 2016. The Muzinich Low Duration Fund commenced operations on June 30, 2016. The Muzinich High Income Floating Rate Fund had not yet commenced operations as of the date of this SAI.

GLOSSARY

As used in this SAI, the following terms have the meanings listed:

“Accountant” means U.S. Bancorp Fund Services, LLC.

“Administrator” means U.S. Bancorp Fund Services, LLC.

“Advisor” or “Muzinich” means Muzinich & Co., Inc., the Funds’ investment advisor.

“Board” means the Board of Trustees of the Trust.

“CFTC” means Commodities Future Trading Commission.

“Code” means the Internal Revenue Code of 1986, as amended the rules thereunder, IRS interpretations and any private letter rulings or similar authority upon which the Funds may rely.

“Custodian” means U.S. Bank National Association.

“Distributor” means Quasar Distributors, LLC.

“Fund” means each of the: Muzinich High Income Floating Rate Fund, Muzinich U.S. High Yield Corporate Bond Fund, Muzinich Low Duration Fund, and Muzinich Credit Opportunities Fund (together, the “Funds”).

“Independent Trustee” means a Trustee that is not an interested person of the Trust as that term is defined in Section 2(a)(19) of the 1940 Act.

“IRS” means U.S. Internal Revenue Service.

“Moody’s” means Moody’s Investors Service.

“NAV” means net asset value per share.

“NRSRO” means a nationally recognized statistical rating organization.

“SAI” means Statement of Additional Information.

“SEC” means the U.S. Securities and Exchange Commission.

“S&P” means Standard & Poor’s Corporation, a division of the McGraw Hill Companies.

“Transfer Agent” means U.S. Bancorp Fund Services, LLC.

“Trust” means Professionally Managed Portfolios.

“U.S.” means United States.

“USBFS” means U.S. Bancorp Fund Services, LLC

“U.S. Government Securities” means obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities.

“1933 Act” means the Securities Act of 1933, as amended, and including rules and regulations as promulgated thereunder.

“1934 Act” means the Securities Exchange Act of 1934, as amended, and including rules and resolutions as promulgated thereunder.

“1940 Act” means the Investment Company Act of 1940, as amended, and including rules and regulations SEC interpretations and any exemptive order applicable to the Funds or interpretive relief promulgated thereunder.

THE TRUST

The Trust is a Massachusetts business trust organized on February 24, 1987, and is registered with the SEC as an open-end management investment company. Prior to May 1991, the Trust was known as the Avondale Investment Trust. The Trust's Agreement and Declaration of Trust (the "Declaration of Trust") permits the Trust's Board of Trustees (the "Board") to issue an unlimited number of full and fractional shares of beneficial interest, without par value, which may be issued in any number of series. The Trust consists of various series that represent separate investment portfolios. The Board may from time to time issue other series, the assets and liabilities of which will be separate and distinct from any other series. This SAI relates only to the Funds.

The shareholders of a Massachusetts business trust could, under certain circumstances, be held personally liable as partners for its obligations. However, the Declaration of Trust contains an express disclaimer of shareholder liability for acts or obligations of the Trust.

The Declaration of Trust also provides for indemnification and reimbursement of expenses out of the Funds' assets for any shareholder held personally liable for obligations of the Funds or the Trust. The Declaration of Trust provides that the Trust shall, upon request, assume the defense of any claim made against any shareholder for any act or obligation of the Funds or the Trust and satisfy any judgment thereon. All such rights are limited to the assets of the Funds. The Declaration of Trust further provides that the Trust may maintain appropriate insurance (for example, fidelity bonding and errors and omissions insurance) for the protection of the Trust, its shareholders, trustees, officers, employees and agents to cover possible tort and other liabilities. However, the activities of the Trust as an investment company would not likely give rise to liabilities in excess of the Trust's total assets. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which both inadequate insurance exists and a Fund itself is unable to meet its obligations.

Fund History

Each Fund is a diversified series of the Trust. This means that for 75% of its total assets, each Fund may not invest more than 5% of its total assets in securities of a single issuer or hold more than 10% of the outstanding voting shares of a single issuer. Under applicable federal securities laws, the diversification of a mutual fund's holdings is measured at the time a fund purchases a security. However, if a fund purchases a security and holds it for a period of time, the security may become a larger percentage of the fund's total assets due to movements in the financial markets. If the market affects several securities held by a fund, the fund may have a greater percentage of its assets invested in securities of fewer issuers. Accordingly, a fund would be subject to the risk that its performance may be hurt disproportionately by the poor performance of relatively few securities despite the fund qualifying as a diversified fund under applicable federal securities laws.

The Funds do not hold themselves out as related to any other series within the Trust for purposes of investment and investor services, nor do they share the same investment advisor with any other series of the Trust. The Funds' Prospectus and this SAI are a part of the Trust's Registration Statement filed with the SEC. Copies of the Trust's complete Registration Statement may be obtained from the SEC upon payment of the prescribed fee or may be accessed free of charge at the SEC's website at www.sec.gov.

The Muzinich Credit Opportunities Fund ("Credit Opportunities Fund") commenced operations on January 3, 2013. The Muzinich U.S. High Yield Corporate Bond Fund ("U.S. High Yield Fund") commenced operations on March 31, 2016. The Muzinich Low Duration Fund ("Low Duration Fund") commenced operations on June 30, 2016. The Muzinich High Income Floating Rate Fund commenced operations on June 29, 2018.

INVESTMENT POLICIES AND RISKS

The following information supplements the discussion of each Fund's investment objective and policies as set forth in the Prospectuses. The Funds may invest in the following types of investments, which are subject to certain risks, as discussed below.

Fixed Income Securities

High Yield and Other Securities

Each Fund will invest in debt securities, including bonds and debentures (which are long-term) and notes (which may be short- or long-term). Each Fund will invest in securities that are rated below investment grade or non-rated. Investments in high yield securities (*i.e.*, less than investment grade), while providing greater income and opportunity for gain than investments in higher-rated securities, entail relatively greater risk of loss of income or principal. Lower-grade obligations are commonly referred to as "junk bonds." Market prices of high-yield, lower-grade obligations may fluctuate more than market prices of higher-rated securities. Lower grade, fixed income securities tend to reflect short-term corporate and market developments to a greater extent than higher-rated obligations which, assuming no change in their fundamental quality, react primarily to fluctuations in the general level of interest rates.

Each Fund may purchase unrated securities. Unrated securities may be less liquid than comparable rated securities and involve the risk that the portfolio manager may not accurately evaluate the securities comparative credit rating.

The high yield market at times is subject to substantial volatility. An economic downturn or increase in interest rates may have a more significant effect on high yield securities and their markets, as well as on the ability of securities' issuers to repay principal and interest. Issuers of high yield securities may be of low creditworthiness and the high yield securities may be subordinated to the claims of senior lenders. During periods of economic downturn or rising interest rates the issuers of high yield securities may have greater potential for insolvency and a higher incidence of high yield bond defaults may be experienced.

The prices of high yield securities have been found to be less sensitive to interest rate changes than higher-rated investments but are more sensitive to adverse economic changes or individual corporate developments. During an economic downturn or substantial period of rising interest rates, highly leveraged issuers may experience financial stress which would adversely affect their ability to service their principal and interest payment obligations, to meet projected business goals, and to obtain additional financing. If the issuer of a high yield security owned by a Fund defaults, the Fund may incur additional expenses in seeking recovery. Periods of economic uncertainty and changes can be expected to result in increased volatility of the market prices of high yield securities and a Fund's NAV per share. Yields on high yield securities will fluctuate over time. Furthermore, in the case of high yield securities structured as zero coupon or pay-in-kind securities, their market prices are affected to a greater extent by interest rate changes and therefore tend to be more volatile than the market prices of securities which pay interest periodically and in cash.

Certain securities held by each Fund including high yield securities, may contain redemption or call provisions. If an issuer exercises these provisions in a declining interest rate market, a Fund would have to replace the security with a lower yielding security, resulting in a decreased return for the investor. Conversely, a high yield security's value will decrease in a rising interest rate market, as will a Fund's net assets.

The secondary market for high yield securities may at times become less liquid or respond to adverse publicity or investor perceptions making it more difficult for each Fund to accurately value high yield

securities or dispose of them. To the extent a Fund owns or may acquire illiquid or restricted high yield securities, these securities may involve special registration responsibilities, liabilities and costs, liquidity difficulties, and judgment will play a greater role in valuation because there is less reliable and objective data available.

Special tax considerations are associated with investing in high yield bonds structured as zero coupon or pay-in-kind securities. The Funds will report the interest on these securities as income even though it receives no cash interest until the security's maturity or payment date. Further, the Funds must distribute substantially all of its income to its shareholders to qualify for pass-through treatment under the tax law. Accordingly, a Fund may have to dispose of its portfolio securities under disadvantageous circumstances to generate cash or may have to borrow to satisfy distribution requirements.

Credit ratings evaluate the safety of principal and interest payments, not the market value risk of high yield securities. Since credit rating agencies may fail to timely change the credit ratings to reflect subsequent events, the Advisor monitors the issuers of high yield securities in the portfolio to determine if the issuers will have sufficient cash flow and profits to meet required principal and interest payments, and to attempt to assure the securities' liquidity so the Fund can meet redemption requests. To the extent that a Fund invests in high yield securities, the achievement of its investment objective may be more dependent on the Advisor's credit analysis than would be the case for higher quality bonds. The Funds may retain a portfolio security whose rating has been changed.

Senior Loans and Assignments

Each Fund may purchase participations in commercial loans. Such indebtedness may be secured or unsecured. Senior loans typically represent direct participation in a loan to a corporate borrower, and generally are offered by banks or other financial institutions or lending syndicates. A Fund may participate in such syndications, or can buy part of a loan, becoming a part lender. When purchasing senior loans, a Fund assumes the credit risk associated with the corporate borrower and may assume the credit risk associated with an interposed bank or other financial intermediary. The participation interests in which each Fund intends to invest may not be rated by any nationally recognized rating service. Each Fund may invest in debtor-in-possession financings (commonly known as "DIP financings"). DIP financings are arranged when an entity seeks the protections of the bankruptcy court under Chapter 11 of the U.S. Bankruptcy Code. These financings allow the entity to continue its business operations while reorganizing under Chapter 11. Such financings constitute senior liens on unencumbered security (*i.e.*, security not subject to other creditors' claims). There is a risk that the entity will not emerge from Chapter 11 and be forced to liquidate its assets under Chapter 7 of the U.S. Bankruptcy Code. In the event of liquidation, a Fund's only recourse will be against the property securing the DIP financing. A loan is often administered by an agent bank acting as agent for all holders. The agent bank administers the terms of the loan, as specified in the loan agreement. In addition, the agent bank is normally responsible for the collection of principal and interest payments from the corporate borrower and the apportionment of these payments to the credit of all institutions which are parties to the loan agreement. Unless, under the terms of the loan or other indebtedness, a Fund has direct recourse against the corporate borrower, the Fund may have to rely on the agent bank or other financial intermediary to apply appropriate credit remedies against a corporate borrower. A financial institution's employment as agent bank might be terminated in the event that it fails to observe a requisite standard of care or becomes insolvent. A successor agent bank would generally be appointed to replace the terminated agent bank, and assets held by the agent bank under the loan agreement should remain available to holders of such indebtedness. However, if assets held by the agent bank for the benefit of a Fund were determined to be subject to the claims of the agent bank's general creditors, a Fund might incur certain costs and delays in realizing payment on a senior loan and could suffer a loss of principal and/or interest. In situations involving other interposed financial institutions (*e.g.*, an insurance company or governmental agency) similar risks may arise. Purchasers of loans and other forms of direct indebtedness depend primarily upon the creditworthiness of the corporate borrower for payment of principal and interest.

If a Fund does not receive scheduled interest or principal payments on such indebtedness, the Fund's share price and yield could be adversely affected. Loans that are fully secured offer the Funds more protection than an unsecured loan in the event of non-payment of scheduled interest or principal. However, there is no assurance that the liquidation of collateral from a secured loan would satisfy the corporate borrower's obligation, or that the collateral can be liquidated. A Fund may invest in senior loans with credit quality comparable to that of issuers of its securities investments. Indebtedness of companies whose creditworthiness is poor involves substantially greater risks, and may be highly speculative. Some companies may never pay off their indebtedness, or may pay only a small fraction of the amount owed. Consequently, when investing in indebtedness of companies with poor credit, the Funds bear a substantial risk of losing the entire amount invested.

Each Fund is diversified and limits the amount of its total assets that it will invest in any one issuer and each Fund limits the amount of its total assets that it will invest in issuers within the same industry (see "Investment Restrictions"). For purposes of these limits, a Fund generally will treat the corporate borrower as the "issuer" of indebtedness held by the Fund. In the case of senior loans where a bank or other lending institution serves as a financial intermediary between a Fund and the corporate borrower, if the participation does not shift to the Fund the direct debtor-creditor relationship with the corporate borrower, SEC interpretations require a Fund to treat both the lending bank or other lending institution and the corporate borrower as "issuers." Treating a financial intermediary as an issuer of indebtedness may restrict the Funds' ability to invest in indebtedness related to a single financial intermediary, or a group of intermediaries engaged in the same industry, even if the underlying borrowers represent many different companies and industries. Loans and other types of direct indebtedness may not be readily marketable and may be subject to restrictions on resale. In some cases, negotiations involved in disposing of indebtedness may require weeks to complete. Consequently, some indebtedness may be difficult or impossible to dispose of readily at what the Advisor believes to be a fair price. Additionally, even where there is a market for certain loans the settlement period may be extended, up to several weeks or longer. That means a Fund may have a limited ability to receive payment promptly on the sale of some of the loans in its portfolio. In addition, valuation of illiquid indebtedness involves a greater degree of judgment in determining a Fund's net asset value than if that value were based on available market quotations, and could result in significant variations in the Fund's daily share price. At the same time, some loan interests are traded among certain financial institutions and accordingly may be deemed liquid. As the market for different types of indebtedness develops, the liquidity of these instruments is expected to improve. In addition, each Fund currently intends to treat indebtedness for which there is no readily available market as illiquid for purposes of a Fund's limitation on illiquid investments. Investments in senior loans are considered to be debt obligations for purposes of the Trust's investment restriction relating to the lending of funds or assets by a Fund.

Investments in loans through a direct assignment of the financial institution's interests with respect to the loan may involve additional risks to the Funds. For example, if a loan is foreclosed, a Fund could become part owner of any collateral, and would bear the costs and liabilities associated with owning and disposing of the collateral. In addition, it is conceivable that under emerging legal theories of lender liability, a Fund could be held liable as co-lender. It is unclear whether loans and other forms of direct indebtedness offer securities law protections against fraud and misrepresentation. In the absence of definitive regulatory guidance, each Fund relies upon the Advisor's research in an attempt to avoid situations where fraud or misrepresentation could adversely affect the Fund.

U.S. Government Securities

General. The Funds may invest in U.S. Government Securities. U.S. Government Securities include securities issued by the U.S. Treasury and by U.S. Government agencies and instrumentalities. U.S. Government Securities may be supported by the full faith and credit of the United States; by the right of the issuer to borrow from the U.S. Treasury; by the discretionary authority of the U.S. Treasury to lend to the issuer; or solely by the creditworthiness of the issuer. Holders of U.S. Government Securities not backed

by the full faith and credit of the United States must look principally to the agency or instrumentality issuing the obligation for repayment and may not be able to assert a claim against the United States in the event that the agency or instrumentality does not meet its commitment. No assurance can be given that the U.S. Government would provide support if it were not obligated to do so by law. Neither the U.S. Government nor any of its agencies or instrumentalities guarantees the market value of the securities they issue.

Corporate Debt Obligations

General. The Funds may invest in corporate debt obligations. Corporate debt obligations include corporate bonds, debentures, notes, commercial paper and other similar corporate debt instruments. These instruments are used by companies to borrow money from investors. The issuer pays the investor a fixed or variable rate of interest and must repay the amount borrowed at maturity. Commercial paper (short-term unsecured promissory notes) is issued by companies to finance their current obligations and normally has a maturity of less than nine months. The Funds may also invest in corporate fixed income securities registered and sold in the U.S. by foreign issuers (Yankee bonds) and those sold outside the U.S. by foreign or U.S. issuers (Eurobonds).

Variable and Floating Rate Securities

The Funds may invest in variable and floating rate securities. Fixed income securities that have variable or floating rates of interest may, under certain limited circumstances, have varying principal amounts. These securities pay interest at rates that are adjusted periodically according to a specified formula, usually with reference to one or more interest rate indices or market interest rates (the “underlying index”). The interest paid on these securities is a function primarily of the underlying index upon which the interest rate adjustments are based. These adjustments minimize changes in the market value of the obligation. Similar to fixed rate debt instruments, variable and floating rate instruments are subject to changes in value based on changes in market interest rates or changes in the issuer’s creditworthiness. The rate of interest on securities may be tied to U.S. Government Securities or indices on those securities as well as any other rate of interest or index.

Variable and floating rate demand notes of corporations are redeemable upon a specified period of notice. These obligations include master demand notes that permit investment of fluctuating amounts at varying interest rates under direct arrangements with the issuer of the instrument. The issuer of these obligations often has the right, after a given period, to prepay the outstanding principal amount of the obligations upon a specified number of days’ notice.

Certain securities may have an initial principal amount that varies over time based on an interest rate index, and, accordingly, a Fund might be entitled to less than the initial principal amount of the security upon the security’s maturity. A Fund intends to purchase these securities only when the Advisor believes the interest income from the instrument justifies any principal risks associated with the instrument. The Advisor may attempt to limit any potential loss of principal by purchasing similar instruments that are intended to provide an offsetting increase in principal. There can be no assurance that the Advisor will be able to limit the effects of principal fluctuations and, accordingly, a Fund may incur losses on those securities even if held to maturity without issuer default.

There may not be an active secondary market for any particular floating or variable rate instruments, which could make it difficult for a Fund to dispose of the instrument during periods that the Fund is not entitled to exercise any demand rights it may have. A Fund could, for this or other reasons, suffer a loss with respect to those instruments. The Advisor monitors the liquidity of each Fund’s investment in variable and floating rate instruments, but there can be no guarantee that an active secondary market will exist.

Non-U.S. Dollar Denominated Securities and Other Fixed Income Securities

Each Fund may invest in short-term money market instruments issued in the U.S. or abroad, denominated in U.S. dollars or any foreign currency. Short-term money market instruments include repurchase agreements, short-term fixed or variable rate certificates of deposit, time deposits with a maturity no greater than 180 days, bankers' acceptances, commercial paper rated A-1 by S&P or Prime-1 by Moody's or in similar other money market securities. Certificates of deposit represent an institution's obligation to repay funds deposited with it that earn a specified interest rate over a given period. Bankers' acceptances are negotiable obligations of a bank to pay a draft, which has been drawn by a customer, and are usually backed by goods in international trade. Time deposits are non-negotiable deposits with a banking institution that earn a specified interest rate over a given period. Certificates of deposit and time deposits generally may be withdrawn on demand by the Fund but may be subject to early withdrawal penalties that could reduce the Fund's performance.

Each Fund may also invest in other high yield fixed income securities denominated in U.S. dollars, any foreign currency or in a multi-national currency unit (*e.g.*, the European Currency Unit).

The Funds may invest in non-U.S. dollar denominated securities including debt obligations denominated in foreign or composite currencies (such as the European Currency Unit) issued by (1) foreign national, provincial, state or municipal governments or their political subdivisions; (2) international organizations designated or supported by governmental entities (*e.g.*, the World Bank and the European Community); (3) non-dollar securities issued by the U.S. Government; and (4) foreign corporations.

Risks of Debt Securities

General. Yields on debt securities, including municipal securities, are dependent on a variety of factors, including the general conditions of the debt securities markets, the size of a particular offering, the maturity of the obligation and the rating of the issue. Debt securities with longer maturities tend to produce higher yields and are generally subject to greater price movements than obligations with shorter maturities.

Certain debt securities may be subject to extension risk, which refers to the change in total return on a security resulting from an extension or abbreviation of the security's maturity. Issuers may prepay fixed rate debt securities when interest rates fall, forcing the Fund to invest in securities with lower interest rates. Issuers of debt securities are also subject to the provisions of bankruptcy, insolvency and other laws affecting the rights and remedies of creditors that may restrict the ability of the issuer to pay, when due, the principal of and interest on its debt securities. The possibility exists therefore, that, as a result of bankruptcy, litigation or other conditions, the ability of an issuer to pay, when due, the principal of and interest on its debt securities may become impaired.

Interest Rate Risk. The market value of the interest-bearing debt securities held by a Fund will be affected by changes in interest rates. There is normally an inverse relationship between the market value of securities sensitive to prevailing interest rates and actual changes in interest rates. The longer the remaining maturity (and duration) of a security, the more sensitive the security is to changes in interest rates. All debt securities, including U.S. Government Securities, can change in value when there is a change in interest rates. As a result, an investment in a Fund is subject to risk even if all debt securities in the Fund's investment portfolio are paid in full at maturity.

Credit Risk. Changes in the ability of an issuer to make payments of interest and principal and in the markets' perception of an issuer's creditworthiness will also affect the market value of that issuer's debt securities. The financial condition of an issuer of a debt security held by the Fund may cause it to default on interest or principal payments due on a security. This risk generally increases as security credit ratings fall.

The Funds may also invest in investment grade and non-investment grade debt securities, including (i) “distressed securities” rated at the time of purchase D by S&P or C by Moody’s or (ii) unrated investment grade and non-investment grade, but determined to be of comparable quality by the Advisor (see “Distressed Debt Securities or Junk Bond Risk” below).

Each of the Funds may retain securities whose rating has been lowered below the lowest permissible rating category if the Advisor determines that retaining such security is in the best interests of the Fund.

Moody’s, S&P and other NRSROs are private services that provide ratings of the credit quality of debt obligations, including convertible securities. A description of the range of ratings assigned to various types of bonds and other securities by several NRSROs is included in Appendix A to this SAI. The Advisor may use these ratings to determine whether to purchase, sell or hold a security. Ratings are general and are not absolute standards of quality. Securities with the same maturity, interest rate and rating may have different market prices. If an issue of securities ceases to be rated or if its rating is reduced after it is purchased by a Fund, the Advisor will determine whether the Fund should continue to hold the obligation. Credit ratings attempt to evaluate the safety of principal and interest payments and do not evaluate the risks of fluctuations in market value. The rating of an issuer is a rating agency’s view of potential developments related to the issuer and may not necessarily reflect actual outcomes. Also, rating agencies may fail to make timely changes in credit ratings. An issuer’s current financial condition may be better or worse than a rating indicates. Unrated securities may not be as actively traded as rated securities. Because a downgrade often results in a reduction in the market price of the security, the sale of a downgraded security may result in a loss.

Credit ratings for debt securities provided by rating agencies evaluate the safety of principal and interest payments, not market value risk. The rating of an issuer is a rating agency’s view of past and future potential developments related to the issuer and may not necessarily reflect actual outcomes. There can be a lag between the time of developments relating to an issuer and the time a rating is assigned and updated.

Leverage Transactions

General

Each Fund may use leverage to increase potential returns, although use of leverage is not a principal investment strategy for the Floating Rate Fund, the U.S. High Yield Fund, the Low Duration Fund or the Credit Opportunities Fund. Leverage involves special risks and may involve speculative investment techniques. Leverage exists when cash made available to a Fund through an investment technique is used to make additional Fund investments. Leverage transactions include borrowing for other than temporary or emergency purposes, lending portfolio securities, entering into reverse repurchase agreements, and purchasing securities on a when-issued, delayed delivery or forward commitment basis. A Fund uses these investment techniques only when the Advisor believes that the leveraging and the returns available to a Fund from investing the cash will provide investors with a potentially higher return. (See “Risks” below.) Each Fund will reduce its borrowing amount within three days, if that Fund’s asset coverage falls below the amount required by the 1940 Act.

Borrowing. Currently, the 1940 Act permits a Fund to borrow money from banks in amounts of up to one-third of the Fund’s total assets (including the amount borrowed). To the extent permitted by the 1940 Act, or the rules and regulations thereunder, a Fund may also borrow an additional 5% of its total assets without regard to the foregoing limitation for temporary purposes, such as the clearance of portfolio transactions. To limit the risks attendant to borrowing, the 1940 Act requires a Fund to maintain at all times an “asset coverage” of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of a Fund’s total assets, minus liabilities other than borrowings, bears to the aggregate amount of all

borrowings. Borrowing money to increase a Fund's investment portfolio is known as "leveraging." Borrowing, especially when used for leverage, may cause the value of a Fund's shares to be more volatile than if the Fund did not borrow. This is because borrowing tends to magnify the effect of any increase or decrease in the value of a Fund's portfolio holdings. Borrowed money thus creates an opportunity for greater gains, but also greater losses. To repay borrowings, a Fund may have to sell securities at a time and at a price that is unfavorable to the Fund. There also are costs associated with borrowing money, and these costs would offset and could eliminate the Fund's net investment income in any given period.

The use of borrowing by a Fund involves special risk considerations that may not be associated with other funds having similar objectives and policies. Since substantially all of a Fund's assets fluctuate in value, while the interest obligation resulting from a borrowing will be fixed by the terms of the Fund's agreement with its lender, the net asset value per share of the Fund will tend to increase more when its portfolio securities increase in value and to decrease more when its portfolio assets decrease in value than would otherwise be the case if the Fund did not borrow funds. In addition, interest costs on borrowings may fluctuate with changing market rates of interest and may partially offset or exceed the return earned on borrowed funds. Under adverse market conditions, a Fund might have to sell portfolio securities to meet interest or principal payments at a time when fundamental investment considerations would not favor such sales. Each Fund will reduce its borrowing amount within three days, if that Fund's asset coverage falls below the amount required by the 1940 Act.

Senior Securities. Pursuant to Section 18(f)(1) of the 1940 Act, a Fund may not issue any class of senior security or sell any senior security of which it is the issuer, except that the Fund shall be permitted to borrow from any bank so long as immediately after such borrowings, there is an asset coverage of at least 300% and that in the event such asset coverage falls below this percentage, the Fund shall reduce the amount of its borrowings, within 3 days, to an extent that the asset coverage shall be at least 300%.

Securities Lending. Upon approval from the Board, the Fund may lend the securities in its portfolio to brokers, dealers and financial institutions (but not individuals) in order to increase the return on its portfolio. The SEC currently requires that the following conditions must be met whenever the Fund's portfolio securities are loaned: (1) the Fund must receive at least 100% cash collateral from the borrower; (2) the borrower must increase such collateral whenever the market value of the securities rises above the level of such collateral; (3) the Fund must be able to terminate the loan at any time; (4) the Fund must receive reasonable interest on the loan, as well as any dividends, interest or other distributions on the loaned securities, and any increase in market value; (5) the Fund may pay only reasonable custodian fees approved by the Board in connection with the loan; (6) while voting rights on the loaned securities may pass to the borrower, the Board must terminate the loan and regain the right to vote the securities if a material event adversely affecting the investment occurs, and (7) the Fund may not loan its portfolio securities so that the value of the loaned securities is more than one-third of its total asset value, including collateral received from such loans. These conditions may be subject to future modification. Such loans will be terminable at any time upon specified notice. The Fund might experience the risk of loss if the institution with which it has engaged in a portfolio loan transaction breaches its agreement with the Fund. In addition, the Fund will not enter into any portfolio security lending arrangement having a duration of longer than one year. The principal risk of portfolio lending is potential default or insolvency of the borrower. In either of these cases, the Fund could experience delays in recovering securities or collateral or could lose all or part of the value of the loaned securities. As part of participating in a lending program, the Fund may be required to invest in collateralized debt or other securities that bear the risk of loss of principal. In addition, all investments made with the collateral received are subject to the risks associated with such investments. If such investments lose value, the Fund will have to cover the loss when repaying the collateral.

Any loans of portfolio securities are fully collateralized based on values that are marked-to-market daily. Any securities that the Fund may receive as collateral will not become part of the Fund's investment portfolio at the time of the loan and, in the event of a default by the borrower, the Fund will, if permitted

by law, dispose of such collateral except for such part thereof that is a security in which the Fund is permitted to invest. During the time securities are on loan, the borrower will pay the Fund any accrued income on those securities, and the Fund may invest the cash collateral and earn income or receive an agreed-upon fee from a borrower that has delivered cash-equivalent collateral.

Reverse Repurchase Agreements. The Funds may enter into reverse repurchase agreements which are transactions in which a Fund purchases a security and simultaneously agrees to resell that security to the seller at an agreed upon price on an agreed upon future date, normally, one to seven days later. Such reverse repurchase agreements would represent no more than 15% of a Fund's assets. If a Fund enters into a reverse repurchase agreement, it will maintain possession of the purchased securities and any underlying collateral.

Reverse repurchase agreements involve the risk that the market value of securities retained in lieu of sale by a Fund may decline below the price of the securities such Fund has sold but is obliged to repurchase. If the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, such buyer or its trustee or receiver may receive an extension of time to determine whether to enforce a Fund's obligation to repurchase the securities. During that time, a Fund's use of the proceeds of the reverse repurchase agreement effectively may be restricted.

Whenever a Fund enters into a reverse repurchase agreement, it will establish a segregated account in which it will maintain liquid assets in an amount at least equal to the repurchase price marked to market daily (including accrued interest), and will subsequently monitor the account to ensure that such equivalent value is maintained. Such assets will include U.S. Government securities, or other liquid, high-grade debt securities. Reverse repurchase agreements are not considered to be borrowings for the purpose of a Fund's limitation on borrowing when assets have been appropriately segregated as described in the prior two sentences.

When-Issued Securities and Forward Commitments. The Funds may purchase securities offered on a "when-issued" and "forward commitment" basis (including a delayed delivery basis). Securities purchased on a "when-issued" or "forward commitment basis" are securities not available for immediate delivery despite the fact that a market exists for those securities. A purchase is made on a "delayed delivery" basis when the transaction is structured to occur sometime in the future.

When these transactions are negotiated, the price, which is generally expressed in yield terms, is fixed at the time the commitment is made, but delivery and payment for the securities take place at a later date. Normally, the settlement date occurs within two months after the transaction, but delayed settlements beyond two months may be negotiated. During the period between a commitment and settlement, no payment is made for the securities purchased by the purchaser and, thus, no interest accrues to the purchaser from the transaction. At the time a Fund makes the commitment to purchase securities on a when-issued basis or forward commitment, the Fund will record the transaction as a purchase and thereafter reflect the value each day of such securities in determining its NAV. No when-issued or forward commitments will be made by a Fund if, as a result, more than 5% of the Fund's total assets would be committed to such transactions.

Risks

Leverage creates the risk of magnified capital losses. Leverage may involve the creation of a liability that requires the Fund to pay interest (for instance, reverse repurchase agreements) or the creation of a liability that does not entail any interest costs (for instance, forward commitment costs).

The risks of leverage include a higher volatility of the NAV of a Fund's securities which may be magnified by favorable or adverse market movements or changes in the cost of cash obtained by leveraging and the yield from invested cash. So long as a Fund is able to realize a net return on its investment portfolio that is

higher than interest expense incurred, if any, leverage will result in higher current net investment income for the Fund than if the Fund were not leveraged. Changes in interest rates and related economic factors could cause the relationship between the cost of leveraging and the yield to change so that rates involved in the leveraging arrangement may substantially increase relative to the yield on the obligations in which the proceeds of the leveraging have been invested. To the extent that the interest expense involved in leveraging approaches the net return on a Fund's investment portfolio, the benefit of leveraging will be reduced, and, if the interest expense incurred as a result of leveraging on borrowings were to exceed the net return to investors, the Fund's use of leverage would result in a lower rate of return than if the Fund were not leveraged. In an extreme case, if a Fund's current investment income were not sufficient to meet the interest expense of leveraging, it could be necessary for the Fund to liquidate certain of its investments at an inappropriate time.

Convertible Securities

General. Each Fund may invest in convertible securities. Each Fund may also invest in U.S. or foreign securities convertible into foreign common stock. Convertible securities include debt securities, preferred stock or other securities that may be converted into or exchanged for a given amount of common stock of the same or a different issuer during a specified period and at a specified price in the future. A convertible security entitles the holder to receive interest on debt or the dividend on preferred stock until the convertible security matures or is redeemed, converted or exchanged.

Convertible securities rank senior to common stock in a company's capital structure but are usually subordinated to comparable nonconvertible securities. Convertible securities have unique investment characteristics in that they generally: (1) have higher yields than common stocks, but lower yields than comparable non-convertible securities; (2) are less subject to fluctuation in value than the underlying stocks since they have fixed income characteristics; and (3) provide the potential for capital appreciation if the market price of the underlying common stock increases.

A convertible security may be subject to redemption at the option of the issuer at a price established in the convertible security's governing instrument. If a convertible security is called for redemption, a Fund will be required to permit the issuer to redeem the security, convert it into the underlying common stock or sell it to a third party.

Risks. Investment in convertible securities generally entails less risk than an investment in the issuer's common stock. Convertible securities are typically issued by smaller capitalization companies whose stock price may be volatile. Therefore, the price of a convertible security may reflect variations in the price of the underlying common stock in a way that nonconvertible debt does not. The extent to which such risk is reduced, however, depends in large measure upon the degree to which the convertible security sells above its value as a fixed income security.

Security Ratings Information. Each Fund's investments in convertible securities are subject to the credit risk relating to the financial condition of the issuers of the securities that each Fund holds. Each Fund may purchase unrated convertible securities and preferred stock if, at the time of purchase, the Advisor believes that they are of comparable quality to rated securities that the Fund may purchase.

Unrated securities may not be as actively traded as rated securities. A Fund may retain securities whose rating has been lowered below the lowest permissible rating category (or that are unrated and determined by the Advisor to be of comparable quality to securities whose rating has been lowered below the lowest permissible rating category) if the Advisor determines that retaining such security is in the best interests of the Fund. Because a downgrade often results in a reduction in the market price of the security, the sale of a downgraded security may result in a loss.

Moody's, S&P and other NRSROs are private services that provide ratings of the credit quality of debt obligations, including convertible securities. A description of the range of ratings assigned to various types of bonds and other securities by several NRSROs is included in Appendix A to this SAI. Each Fund may use these ratings to determine whether to purchase, sell or hold a security. Ratings are general and are not absolute standards of quality. Securities with the same maturity, interest rate and rating may have different market prices. To the extent that the ratings given by an NRSRO may change as a result of changes in such organizations or their rating systems, the Advisor will attempt to substitute comparable ratings. Credit ratings attempt to evaluate the safety of principal and interest payments and do not evaluate the risks of fluctuations in market value. Also, rating agencies may fail to make timely changes in credit ratings. An issuer's current financial condition may be better or worse than a rating indicates.

Credit ratings for debt securities provided by rating agencies evaluate the safety of principal and interest payments, not market value risk. The rating of an issuer is a rating agency's view of past and future potential developments related to the issuer and may not necessarily reflect actual outcomes. There can be a lag between the time of developments relating to an issuer and the time a rating is assigned and updated. See Appendix A for additional information on credit ratings.

Warrants

General. Each of the Funds may hold warrants resulting from reorganizations. Warrants are securities, typically issued with preferred stock or bonds that give the holder the right to purchase a given number of shares of common stock at a specified price and time. The price of the warrant usually represents a premium over the applicable market value of the common stock at the time of the warrant's issuance. Warrants have no voting rights with respect to the common stock, receive no dividends and have no rights with respect to the assets of the issuer.

Risks. Investments in warrants involve certain risks, including the possible lack of a liquid market for the resale of the warrants, potential price fluctuations due to adverse market conditions or other factors and failure of the price of the common stock to rise. If the warrant is not exercised within the specified time period, it becomes worthless.

Derivatives

Each Fund may, but is not required to, use derivatives for risk management purposes or as part of its investment strategies. Derivatives are financial contracts whose values depend on, or are derived from, the value of an underlying asset, reference rate or index. A Fund may use derivatives to earn income and enhance returns, to hedge or adjust the risk profile of its portfolio, to replace more traditional direct investments and to obtain exposure to otherwise inaccessible markets.

There are three types of derivatives in which a Fund may invest: futures, options and swaps. Derivatives may be (1) standardized, exchange-traded contracts or (2) customized, privately negotiated contracts. Exchange-traded derivatives tend to be more liquid and subject to less credit risk than those that are privately negotiated.

The Fund's use of derivatives may involve risks that are different from, or possibly greater than, the risks associated with investing directly in securities or other more traditional instruments. These risks include the risk that the value of a derivative instrument may not correlate perfectly, or at all, with the value of the assets, reference rates, or indexes that they are designed to track. Other risks include: an illiquid secondary market for a particular instrument and possible exchange-imposed price fluctuation limits, either of which may make it difficult or impossible to close out a position when desired; the risk that adverse price movements in an instrument can result in a loss substantially greater than the Fund's initial investment in

that instrument (in some cases, the potential loss is unlimited); and the risk that a counterparty will not perform its obligations.

Each Fund may use the following types of derivatives.

Futures Contracts and Options on Futures Contracts

A futures contract is an agreement that obligates the buyer to buy and the seller to sell a specified quantity of an underlying asset (or settle for cash the value of a contract based on an underlying asset, rate or index) at a specific price on the contract maturity date. Options on futures contracts are options that call for the delivery of futures contracts upon exercise. A Fund may purchase or sell futures contracts and options thereon to hedge against changes in interest rates, securities (through index futures or options) or currencies.

Options

An option is an agreement that, for a premium payment or fee, gives the option holder (the buyer) the right but not the obligation to buy (a “call option”) or sell (a “put option”) the underlying asset (or settle for cash an amount based on an underlying asset, rate or index) at a specified price (the exercise price) during a period of time or on a specified date. Investments in options are considered speculative. A Fund may lose the premium paid for them if the price of the underlying security or other asset decreased or remained the same (in the case of a call option) or increased or remained the same (in the case of a put option). If a put or call option purchased by a Fund were permitted to expire without being sold or exercised, its premium would represent a loss to the Fund. The Funds’ investments in options include the following:

- o *Options on Foreign Currencies.* The Fund may purchase or sell call or put options on foreign currencies that are privately negotiated or traded on U.S. or foreign exchanges for hedging purposes to protect against declines in the U.S. Dollar value of foreign currency denominated securities held by the Fund and against increases in the U.S. Dollar cost of securities to be acquired. The purchase of an option on a foreign currency may constitute an effective hedge against fluctuations in exchange rates, although if rates move adversely, the Fund may forfeit the entire amount of the premium plus related transaction costs. The Fund may also purchase or sell options on foreign currencies for non-hedging purposes as a means of making direct investments in foreign currencies.
- o *Options on Securities.* The Fund may purchase or sell call or put options on securities. The Fund will only exercise an option it purchased if the price of the security was less (in the case of a put option) or more (in the case of a call option) than the exercise price. If the Fund does not exercise an option, the premium it paid for the option will be lost. Normally, the Fund will sell only “covered” options, which means writing an option for securities the Fund owns, but may write an uncovered call option for cross-hedging purposes.
- o *Options on Securities Indices.* An option on a securities index is similar to an option on a security except that, rather than taking or making delivery of a security at a specified price, an option on a securities index gives the holder the right to receive, upon exercise of the option, an amount of cash if the closing level of the chosen index is greater than (in the case of a call) or less than (in the case of a put) the exercise price of the option.

Swaps

A swap, which may be a customized and privately negotiated agreement or a standardized and exchange-traded contract, obligates two parties to exchange a series of cash flows at specified intervals (payment dates) based upon, or calculated by, reference to changes in specified prices or rates for a specified amount of an underlying asset (the “notional” principal amount). Swaps are entered into on a net basis (*i.e.*, the two payment streams are netted out, with a fund receiving or paying, as the case may be, only the net amount of the two payments). Examples of such swaps may include, but are not limited to, currency swaps, interest

rate swaps, total return swaps, and credit default swaps. If a Fund writes swaps, it will segregate the full notional amount to cover the obligation. Payments received by the Fund from swap agreements will result in taxable income, either as ordinary income or capital gains. Except for currency swaps, the notional principal amount is used solely to calculate the payment streams but is not exchanged. With respect to currency swaps, actual principal amounts of currencies may be exchanged by the counterparties at the initiation, and again upon the termination, of the transaction. The swap market has grown substantially in recent years, with a large number of banks and investment banking firms acting both as principals and as agents utilizing standardized swap documentation. As a result, the swap market has become well established and relatively liquid.

Exclusion from Definition of Commodity Pool Operator. Pursuant to amendments by the Commodity Futures Trading Commission to Rule 4.5 under the Commodity Exchange Act (“CEA”), the Advisor has filed a notice of exemption from registration as a “commodity pool operator” with respect to the Funds. The Funds and the Advisor are therefore not subject to registration or regulation as a pool operator under the CEA. In order to claim the Rule 4.5 exemption, the Funds are significantly limited in their ability to invest in commodity futures, options and swaps (including securities futures, broad-based stock index futures and financial futures contracts). As a result, these limitations may have a negative impact on the ability of the Advisor to manage the Funds, and on the Funds’ performance.

Foreign Securities Exposure

The Funds may invest in securities issued by foreign companies or governmental authorities either directly or through depository receipts or exchange traded funds (“ETFs”) (generally “foreign securities”). Investing in foreign securities involves more risk than investing in U.S. securities. Changes in the value of foreign currencies can significantly affect the value of a foreign security held by a Fund, irrespective of developments relating to the issuer. In addition, the values of foreign securities may be affected by changes in exchange control regulations and fluctuations in the relative rates of exchange between the currencies of different nations, as well as by economic and political developments. Other risks involved in investing in foreign securities include the following: there may be less publicly available information about foreign companies comparable to the reports and ratings that are published about companies in the United States; foreign companies are not generally subject to uniform accounting, auditing and financial reporting standards and requirements comparable to those applicable to U.S. companies; some foreign stock markets have substantially less volume than U.S. markets, and securities of some foreign companies are less liquid and more volatile than securities of comparable U.S. companies; there may be less government supervision and regulation of foreign stock exchanges, brokers and listed companies than exist in the United States; and there may be the possibility of expropriation or confiscatory taxation, political or social instability or diplomatic developments which could affect assets of a Fund held in foreign countries. Investments in foreign government debt obligations also involve special risks. The issuer of the debt may be unable or unwilling to pay interest or repay principal when due in accordance with the terms of such debt, and a Fund may have limited legal resources in the event of default. Political conditions, especially a sovereign entity’s willingness to meet the terms of its debt obligations, are of considerable significance.

Foreign Securities Traded in the United States. The Funds may invest directly in foreign equity or debt securities that are traded in the United States. Such securities are generally denominated in United States dollars. They also may be issued originally in the United States. For example, some foreign companies raise capital by selling dollar-denominated bonds to institutional investors in the United States (“Yankee Bonds”). Such bonds have all of the risks associated with foreign securities traded in foreign markets, except for the risks of foreign securities markets. There may be a thin trading market for foreign securities that are traded in the United States, and in some cases such securities may be illiquid, since such securities may be restricted and traded principally among institutional investors. See “Restricted and Illiquid Securities” for the risks of illiquid securities. To the extent that dollar-denominated foreign stocks and

bonds are traded in the United States securities markets, the Funds do not consider them to be foreign securities for purposes of investment policies restricting investments on such securities.

Foreign Securities Traded in Foreign Markets. The Funds may invest in foreign securities that are traded in foreign securities markets. In addition to the general risks of foreign investments discussed above, securities that are traded in foreign markets present special risks, including higher brokerage costs, potentially thinner trading markets, extended settlement periods and the risks of holding securities with foreign sub-custodians and securities depositories. When the Funds are investing in securities that are denominated in foreign currencies, they may also sell securities denominated in foreign currencies and retain the proceeds in those foreign currencies to use at a future date (to purchase other securities denominated in those currencies) or buy foreign currencies outright to purchase securities denominated in those foreign currencies at a future date. The Funds may also engage in foreign currency futures contracts, foreign currency forward contracts, foreign currency exchange contracts and options thereon. See “Foreign Currency” below for a description of such investments. The Funds may also invest some or all of their excess cash in deposit accounts with foreign banks.

Foreign Securities Traded in Emerging Markets. The Funds may invest in the securities of issuers in less developed foreign countries including countries whose economies or securities markets are not yet highly developed (“emerging markets”). Emerging markets are nations with below investment grade credit ratings and social or business activity in the process of rapid growth and industrialization. There are special risks associated with investing in emerging markets in addition to those described above in “Foreign Securities Traded in Foreign Markets.” These special risks include, among others, greater political uncertainties, an economy's dependence on revenues from particular commodities or on international aid or development assistance, currency transfer restrictions, a limited number of potential buyers for such securities and delays and disruptions in securities settlement procedures.

Foreign Currency. A Fund also may invest in foreign currency, foreign currency futures, and foreign currency options. Unlike forward foreign currency exchange contracts, foreign currency futures contracts and options on such contracts are standardized as to amount and delivery period and are traded on boards of trade and commodities exchanges. It is anticipated that such contracts may provide greater liquidity and lower costs than forward currency exchange contracts.

A Fund may purchase Eurodollar instruments, which are U.S. dollar-denominated futures contracts or options thereon which are linked to the London Interbank Offering Rate (“LIBOR”), although foreign currency-denominated instruments are available from time to time. Eurodollar futures contracts enable purchasers to obtain a fixed rate for the lending of funds and sellers to obtain a fixed rate for borrowings. A Fund might use Eurodollar futures contracts and options thereon to hedge against changes in LIBOR, to which many interest rate swaps and fixed-income instruments are linked.

The Funds may temporarily hold funds in bank deposits in foreign currencies during the completion of investment programs and may conduct foreign currency exchange transactions either on a cash basis or at the rate prevailing in the foreign exchange market.

A forward currency contract (“forward contract”) involves an obligation to purchase or sell a specific amount of a specific currency at a future date, which may be any fixed number of days (usually less than one year) from the date of the contract agreed upon by the parties, at a price set at the time of the contract. At or before settlement of a forward currency contract, a Fund may either deliver the currency or terminate its contractual obligation to deliver the currency by purchasing an offsetting contract. If a Fund makes delivery of the foreign currency at or before the settlement of a forward contract, it may be required to obtain the currency through the conversion of assets of the Fund into the currency. Each Fund may close out a forward contract obligating it to purchase currency by selling an offsetting contract, in which case, it will realize a gain or a loss.

Forward contracts are considered “derivatives,” financial instruments whose performance is derived, at least in part, from the performance of another asset (such as a security, currency or an index of securities). A Fund enters into forward contracts in order to “lock in” the exchange rate between the currency it will deliver and the currency it will receive for the duration of the contract. In addition, each Fund may enter into forward contracts to hedge against risks arising from securities the Fund owns or anticipates purchasing, or the U.S. dollar value of interest and dividends paid on those securities. The Fund does not intend to enter into forward contracts on a regular or continuing basis and the Fund will not enter these contracts for speculative purposes.

Each Fund will not have more than 20% (based on the mark-to-market value of its currency hedges) of its total assets committed to forward contracts, or maintain a net exposure to forward contracts that would obligate the Fund to deliver an amount of foreign currency in excess of 105% the value of the Fund's investment securities or other assets denominated in that currency.

Foreign currency transactions involve certain costs and risks. A Fund incurs foreign exchange expenses in converting assets from one currency to another. Forward contracts involve a risk of loss if the Advisor is inaccurate in its prediction of currency movements. The projection of short-term currency market movements is extremely difficult and the successful execution of a short-term hedging strategy is highly uncertain. The precise matching of forward contract amounts and the value of the securities involved is generally not possible. Accordingly, it may be necessary for a Fund to purchase additional foreign currency if the market value of the security is less than the amount of the foreign currency the Fund is obligated to deliver under the forward contract and the decision is made to sell the security and make delivery of the foreign currency. The use of forward contracts as a hedging technique does not eliminate fluctuations in the prices of the underlying securities the Fund owns or intends to acquire, but it does fix a rate of exchange in advance. Although forward contracts can reduce the risk of loss due to a decline in the value of the hedged currencies, they also limit any potential gain that might result from an increase in the value of the currencies. There is also the risk that the other party to the transaction may fail to deliver currency when due which may result in a loss to a Fund.

Participatory Notes. The Funds may invest in securities that are traded in foreign markets through participatory notes. Participatory notes (commonly known as P-notes) are derivative instruments used by foreign funds or investors that would like to invest in securities of a foreign issuer traded in its local market. Foreign funds or investors buy P-notes from brokers who are registered in a foreign issuer’s local market. Such brokers buy shares of an issuer on the local market and create the P-notes to represent interests in the shares. Thus, investments in P-notes present similar risks to investing directly in an issuer’s shares. Normally, P-notes can only be sold back to the broker that issued them. As a result, P-notes also expose investors to counterparty risk, which is the risk that the entity issuing the note may not be able to honor its financial commitment to the purchaser.

Illiquid and Restricted Securities

Each Fund may hold up to 15% of the value of its net assets in illiquid securities. The Advisor will determine a security to be illiquid if it cannot be sold or disposed of in the ordinary course of business within seven days at the value at which a Fund has valued the security. Illiquid securities present the risks that a Fund may have difficulty valuing these holdings and/or may be unable to sell these holdings at the time or price desired.

There are generally no restrictions on a Fund’s ability to invest in restricted securities (that is, securities that are not registered pursuant to the Securities Act of 1933, as amended (the “1933 Act”)), except to the extent such securities may be considered illiquid. Securities issued pursuant to Rule 144A of the Securities Act (“Rule 144A securities”) will be considered liquid if determined to be so under procedures adopted by

the Board of Trustees. The Advisor is responsible for making the determination as to the liquidity of restricted securities (pursuant to the procedures adopted by the Board of Trustees).

Factors considered in determining whether a security is illiquid may include, but are not limited to: the frequency of trades and quotes for the security; the number of dealers willing to purchase and sell the security and the number of potential purchasers; the number of dealers who undertake to make a market in the security; the nature of the security, including whether it is registered or unregistered, and the market place; whether the security has been rated by a nationally recognized statistical rating organization (“NRSRO”); the period of time remaining until the maturity of a debt instrument or until the principal amount of a demand instrument can be recovered through demand; the nature of any restrictions on resale; and with respect to municipal lease obligations and certificates of participation, there is reasonable assurance that the obligation will remain liquid throughout the time the obligation is held and, if unrated, an analysis similar to that which would be performed by an NRSRO is performed. If a restricted security is determined to be liquid, it will not be included within the category of illiquid securities. Investing in Rule 144A securities could have the effect of increasing the level of a Fund’s illiquidity to the extent that the Fund, at a particular point in time may be unable to find qualified institutional buyers interested in purchasing the securities. Each Fund is permitted to sell restricted securities to qualified institutional buyers.

Determination of Liquidity

The Board has the ultimate responsibility for determining whether specific securities are liquid or illiquid and has delegated the function of making determinations of liquidity to the Valuation Committee and the Advisor, pursuant to guidelines approved by the Board. The Advisor determines and monitors the liquidity of the portfolio securities and reports periodically on its decisions to the Board. In making such determinations they take into account a number of factors in reaching liquidity decisions, including but not limited to: (1) the frequency of trades and quotations for the security; (2) the number of dealers willing to purchase or sell the security and the number of other potential buyers; (3) the willingness of dealers to undertake to make a market in the security; and (4) the nature of the marketplace trades, including the time needed to dispose of the security, the method of soliciting offers and the mechanics of the transfer.

An institutional market has developed for certain restricted securities. Accordingly, contractual or legal restrictions on the resale of a security may not be indicative of the liquidity of the security. If such securities are eligible for purchase by institutional buyers in accordance with Rule 144A under the 1933 Act or other exemptions, the Advisor may determine that the securities are liquid.

Investment Company Securities

Open-End and Closed-End Investment Companies

The Funds may invest in the securities of other registered investment companies (affiliated and unaffiliated), including money market mutual funds, subject to the limitations set forth in the Investment Company Act of 1940, as amended (the “1940 Act”). Investments in the securities of other investment companies will likely result in the duplication of advisory fees and certain other expenses. By investing in another investment company, a Fund becomes a shareholder of that investment company. As a result, Fund shareholders indirectly will bear the Fund’s proportionate share of the fees and expenses paid by shareholders of the other investment company, in addition to the fees and expenses Fund shareholders directly bear in connection with the Fund’s own operations.

Each Fund currently intends to limit its investments in securities issued by other investment companies so that not more than 3% of the outstanding voting stock of any one investment company (other than money market funds) will be owned by the Fund, or its affiliated persons, as a whole. In addition to the advisory

and operational fees a Fund bears directly in connection with its own operation, the Fund would also bear its pro rata portions of each other investment company's advisory and operational expenses.

Section 12(d)(1)(A) of the 1940 Act generally prohibits a fund from purchasing (1) more than 3% of the total outstanding voting stock of another fund; (2) securities of another fund having an aggregate value in excess of 5% of the value of the acquiring fund; and (3) securities of the other fund and all other funds having an aggregate value in excess of 10% of the value of the total assets of the acquiring fund. There are some exceptions, however, to these limitations pursuant to various rules promulgated by the SEC.

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in securities of other registered investment companies. The acquisition of shares by a Fund in other registered investment companies is therefore subject to the restrictions of Section 12(d)(1) of the 1940 Act, except as may be permitted by Rule and/or an exemptive order obtained by the other registered investment companies that permits the Fund to invest in the other registered investment companies beyond the limits of Section 12(d)(1), subject to certain terms and conditions, including that the Fund enter into an agreement with the other registered investment companies regarding the terms of the investment.

In accordance with Section 12(d)(1)(F) and Rule 12d1-3 of the 1940 Act, the provisions of Section 12(d)(1) shall not apply to securities purchased or otherwise acquired by the Fund if (i) immediately after such purchase or acquisition not more than 3% of the total outstanding stock of such registered investment company is owned by the Fund and all affiliated persons of the Fund; and (ii) the Fund is not proposing to offer or sell any security issued by it through a principal underwriter or otherwise at a public or offering price including a sales load or service fee that exceeds the limits set forth in Rule 2341 of the Conduct Rules of the Financial Industry Regulatory Authority ("FINRA") applicable to a fund of funds (*e.g.*, 8.5%).

Exchange-Traded Funds

The Funds may also invest in shares of exchange-traded funds ("ETFs"). ETFs are investment companies which seek to replicate the performance, before fees and expenses, of an underlying index of securities. An ETF is similar to a traditional mutual fund but trades at different prices during the day on a securities exchange like a stock. Similar to investments in other investment companies discussed above, a Fund's investments in ETFs will involve duplication of advisory fees and other expenses since the Fund will be investing in another investment company. In addition, the Fund's investment in ETFs is also subject to its limitations on investments in investment companies discussed above. To the extent the Fund invests in ETFs which focus on a particular market segment or industry, the Fund will also be subject to the risks associated with investing in those sectors or industries. The shares of the ETFs in which the Fund will invest will be listed on a national securities exchange and the Fund will purchase and sell these shares on the secondary market at their current market price, which may be more or less than their net asset value. Investors in the Fund should be aware that index-based ETFs are subject to "tracking risk," which is the risk that an ETF will not be able to replicate exactly the performance of the index it tracks.

As a purchaser of ETF shares on the secondary market, a Fund will be subject to the market risk associated with owning any security whose value is based on market price. ETF shares historically have tended to trade at or near their net asset value, but there is no guarantee that they will continue to do so. Unlike traditional mutual funds, shares of an ETF may be purchased and redeemed directly from the ETF only in large blocks (typically 50,000 shares or more) and only through participating organizations that have entered into contractual agreements with the ETF. The Funds do not expect to enter into such agreements and therefore will not be able to purchase and redeem their ETF shares directly from the ETF, but will instead purchase and sell shares on the secondary market.

Other Pooled Investment Vehicles

The Funds may invest in pooled investment vehicles, including limited partnerships. Examples of such vehicles include private Funds and private Funds of funds. A private Fund generally invests in non-public companies that the fund's manager believes will experience significant growth over a certain time period. A private Fund of funds invests in other private Funds of the type described. Investments in private Funds, once made, typically may not be redeemed for several years, though they may be sold to other investors under certain circumstances.

To the extent that the Funds invest in Pooled Investment Vehicles, such investments may be deemed illiquid. (See "Illiquid and Restricted Securities" for the risks of investing in illiquid securities above). In addition, a Fund will bear its ratable share of such vehicles' expenses, including its management expenses and performance fees. Performance fees are fees paid to the vehicle's manager based on the vehicle's investment performance (or returns) as compared to some benchmark. The fees a Fund pays to invest in a Pooled Investment Vehicle may be higher than the fees it would pay if the manager of the Pooled Investment Vehicle managed the Fund's assets directly. Further, the performance fees payable to the manager of a Pooled Investment Vehicle may create an incentive for the manager to make investments that are riskier or more speculative than those it might make in the absence of an incentive fee.

Market and Regulatory Risk

Events in the financial markets and economy may cause volatility and uncertainty and affect performance. Such adverse effects on performance could include a decline in the value and liquidity of securities held by a Fund, unusually high and unanticipated levels of redemptions, an increase in portfolio turnover, a decrease in NAV, and an increase in Fund expenses. It may also be unusually difficult to identify both investment risks and opportunities, in which case investment objectives may not be met. Market events may affect a single issuer, industry, sector, or the market as a whole. Traditionally liquid investments may experience periods of diminished liquidity. During a general downturn in the financial markets, multiple asset classes may decline in value, and a Fund may lose value, regardless of the individual results of the securities and other instruments in which the Fund invests. It is impossible to predict whether or for how long such market events will continue, particularly if they are unprecedented, unforeseen or widespread events or conditions. Therefore it is important to understand that the value of your investment may fall, sometimes sharply and for extended periods, and you could lose money.

Governmental and regulatory actions, including tax law changes, may also impair portfolio management and have unexpected or adverse consequences on particular markets, strategies, or investments. Policy and legislative changes in the United States and in other countries are affecting many aspects of financial regulation, and may in some instances contribute to decreased liquidity and increased volatility in the financial markets. The impact of these changes on the markets, and the practical implications for market participants, may not be fully known for some time. In addition, economies and financial markets throughout the world are becoming increasingly interconnected. As a result, whether or not a Fund invests in securities of issuers located in or with significant exposure to countries experiencing economic and financial difficulties, the value and liquidity of the Fund's investments may be negatively affected.

Special Risks Related to Cyber Security

A Fund and its service providers are susceptible to cyber security risks that include, among other things, theft, unauthorized monitoring, release, misuse, loss, destruction or corruption of confidential and highly restricted data; denial of service attacks; unauthorized access to relevant systems, compromises to networks or devices that a Fund and its service providers use to service a Fund's operations; or operational disruption or failures in the physical infrastructure or operating systems that support the Fund and its service providers. Cyber attacks against or security breakdowns of a Fund or its service providers may adversely impact a

Fund and its shareholders, potentially resulting in, among other things, financial losses; the inability of Fund shareholders to transact business and a Fund to process transactions; inability to calculate a Fund's NAV; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs; and/or additional compliance costs. A Fund may incur additional costs for cyber security risk management and remediation purposes. In addition, cyber security risks may also impact issuers of securities in which a Fund invests, which may cause a Fund's investment in such issuers to lose value. There can be no assurance that a Fund or its service providers will not suffer losses relating to cyber attacks or other information security breaches in the future.

Temporary Defensive Position

Each Fund may invest in prime money market instruments or exchange-traded funds, pending investment of cash balances. Each Fund may also assume a temporary defensive position and may invest without limit in prime quality money market instruments. Prime quality instruments are those instruments that are rated in one of the two highest short-term rating categories by an NRSRO or, if not rated, determined by the Advisor to be of comparable quality.

Money market instruments usually have maturities of one year or less and fixed rates of return. The money market instruments in which a Fund may invest include short-term U.S. Government Securities, commercial paper, bankers' acceptances, certificates of deposit, interest-bearing savings deposits of commercial banks, repurchase agreements concerning securities in which the Fund may invest and money market mutual funds.

Equity Securities

Common and Preferred Stock

General. Each Fund may hold common stock received as part of reorganizations. Common stock represents an equity (ownership) interest in a company, and usually possesses voting rights and earns dividends. Dividends on common stock are not fixed but are declared at the discretion of the issuer. Common stock generally represents the riskiest investment in a company. In addition, common stock generally has the greatest appreciation and depreciation potential because increases and decreases in earnings are usually reflected in a company's stock price.

Each Fund may hold preferred stock received as a result of a reorganization. Preferred stock is a class of stock having a preference over common stock as to the payment of dividends and the recovery of investment should a company be liquidated, although preferred stock is usually junior to the debt securities of the issuer. Preferred stock typically does not possess voting rights and its market value may change based on changes in interest rates.

Risks. The fundamental risk of investing in common and preferred stock is the risk that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. Historically, common stocks have provided greater long-term returns and have entailed greater short-term risks than preferred stocks, fixed-income and money market investments. The market value of all securities, including common and preferred stocks, is based upon the market's perception of value and not necessarily the book value of an issuer or other objective measures of a company's worth. If you invest in a Fund, you should be willing to accept the risks of the stock market and should consider an investment in the Fund only as a part of your overall investment portfolio.

INVESTMENT LIMITATIONS

For purposes of all investment policies of each Fund: (1) the term “1940 Act” includes the rules thereunder, SEC interpretations and any exemptive order upon which a Fund may rely; and (2) the term “Code” includes the rules thereunder, IRS interpretations and any private letter ruling or similar authority upon which a Fund may rely.

The Funds have adopted the following policies and investment restrictions as fundamental policies (unless otherwise noted), which may not be changed without the affirmative vote of the holders of a “majority” of the outstanding voting securities of the Fund. Under the 1940 Act, the “vote of the holders of a majority of the outstanding voting securities” means the vote of the holders of the lesser of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of the Fund’s outstanding shares are represented or (ii) more than 50% of the outstanding shares of a Fund.

Fundamental Limitations

As a matter of fundamental policy, each Fund may not:

1. Borrow money or issue senior securities, except through reverse repurchase agreements or otherwise as permitted under the 1940 Act, as interpreted, modified or otherwise permitted by regulatory authority. Generally, issuing senior securities is prohibited under the 1940 Act; however, certain exceptions apply such as in the case of reverse repurchase agreements, borrowing, and certain other leveraging transactions. For purposes of this limitation, entering into repurchase agreements, lending securities and acquiring any debt security are not deemed to be the making of loans.
2. Act as underwriter (except to the extent the Fund may be deemed to be an underwriter in connection with the sale of securities in its investment portfolio).
3. Invest 25% or more of its net assets, calculated at the time of purchase and taken at market value, in securities of issuers in any one industry or groups of industries (other than U.S. government securities).
4. Purchase or sell real estate, unless acquired as a result of ownership of securities (although the Fund may purchase and sell securities that are secured by real estate and securities of companies that invest or deal in real estate).
5. Purchase or sell physical commodities, unless acquired as a result of ownership of securities or other instruments. This limitation shall not prevent the Fund from purchasing, selling, or entering into futures contracts, or acquiring securities or other instruments and options thereon backed by, or related to, physical commodities.
6. Make loans (except purchases of debt securities and senior loans consistent with the investment policies of the Fund). For purposes of this limitation, entering into repurchase agreements, lending securities and acquiring any debt security are not deemed to be the making of loans.
7. With respect to 75% of its total assets, invest more than 5% of its total assets in securities of a single issuer or hold more than 10% of the voting securities of such issuer. (Does not apply to investment in the securities of the U.S. government, its agencies or instrumentalities or securities of other investment companies.)

With respect to Fundamental Investment Restriction No. 1, under SEC staff interpretations, reverse repurchase agreements, firm commitment agreements and standby commitment agreements will not constitute impermissible borrowings under the 1940 Act if the Fund segregates assets or otherwise covers its obligations to limit a Fund's risk of loss.

Non-Fundamental Limitation

As a matter of non-fundamental policy, the Muzinich High Income Floating Rate Fund may not purchase securities of other investment companies, except in accordance with the 1940 Act. However, at any time that the Fund's shares are acquired by another Fund in accordance with Section 12(d)(1)(G) of the 1940 Act, the Fund shall not purchase securities of a registered open-end investment company or registered unit investment trust in reliance on either Section 12(d)(1)(F) or Section 12(d)(1)(G) of the 1940 Act.

MANAGEMENT

Trustees and Executive Officers

The Board is responsible for the overall management of the Trust, including general supervision and review of the investment activities of the Funds. The Board, in turn, elects the Officers of the Trust, who are responsible for administering the day-to-day operations of the Trust and its separate series. The current Trustees and Officers of the Trust, their years of birth and positions with the Trust, term of office with the Trust and length of time served, their principal occupations for the past five years and other directorships are set forth in the table below.

Name, Address And Age	Position with the Trust	Term of Office and Length of Time Served	Principal Occupation During Past Five Years	Number of Portfolios in Fund Complex⁽²⁾ Overseen by Trustees	Other Directorships Held
Independent Trustees of the Trust⁽¹⁾					
Dorothy A. Berry (born 1943) c/o U.S. Bancorp Fund Services, LLC 2020 E. Financial Way Suite 100 Glendora, CA 91741	Chairman and Trustee	Indefinite Term Since May 1991.	Formerly, President, Talon Industries, Inc. (business consulting); formerly, Executive Vice President and Chief Operating Officer, Integrated Asset Management (investment adviser and manager) and formerly, President, Value Line, Inc. (investment advisory and financial publishing firm).	4	Director, PNC Funds (23 series), PNC Advantage Funds (1 series).

Name, Address And Age	Position with the Trust	Term of Office and Length of Time Served	Principal Occupation During Past Five Years	Number of Portfolios in Fund Complex⁽²⁾ Overseen by Trustees	Other Directorships Held
Wallace L. Cook (born 1939) c/o U.S. Bancorp Fund Services, LLC 2020 E. Financial Way Suite 100 Glendora, CA 91741	Trustee	Indefinite Term Since May 1991.	Investment Consultant; formerly, Chief Executive Officer, Rockefeller Trust Co., (prior thereto Senior Vice President), and Managing Director, Rockefeller & Co. (Investment Manager and Financial Advisor); formerly, Senior Vice President, Norton Simon, Inc. (international consumer products conglomerate).	4	The Dana Foundation.
Eric W. Falkeis (born 1973) c/o U.S. Bancorp Fund Services, LLC 2020 E. Financial Way Suite 100 Glendora, CA 91741	Trustee	Indefinite Term; Since September 2011.	Chief Operating Officer, Direxion Funds (2013 – 2018); formerly, Senior Vice President and Chief Financial Officer (and other positions), U.S. Bancorp Fund Services, LLC (1997 – 2013).	4	Interested Trustee, Direxion Funds (24 series), Direxion Shares ETF Trust (142 series) and Direxion Insurance Trust (2013 – 2018).
Carl A. Froebel (born 1938) c/o U.S. Bancorp Fund Services, LLC 2020 E. Financial Way Suite 100 Glendora, CA 91741	Trustee	Indefinite Term Since May 1991.	Formerly, President and Founder, National Investor Data Services, Inc. (investment related computer software).	4	None.
Steven J. Paggioli (born 1950) c/o U.S. Bancorp Fund Services, LLC 2020 E. Financial Way Suite 100 Glendora, CA 91741	Trustee	Indefinite Term Since May 1991.	Consultant, since July 2001; formerly, Executive Vice President, Investment Company Administration, LLC (mutual fund administrator).	4	Independent Trustee, AMG Funds (67 series); Advisory Board Member, Sustainable Growth Advisers, LP; Independent Director, Chase Investment Counsel.

Elaine E. Richards (born 1968) c/o U.S. Bancorp Fund Services, LLC 2020 E. Financial Way Suite 100 Glendora, CA 91741	President	Indefinite Term; Since March 2013.	Senior Vice President and Legal Compliance Officer, U.S. Bancorp Fund Services, LLC, since July 2007.	Not Applicable	Not Applicable
	Secretary	Indefinite Term; Since February 2008.			
Aaron J. Perkovich (born 1973) c/o U.S. Bancorp Fund Services, LLC 615 East Michigan St. Milwaukee, WI 53202	Vice President	Indefinite Term; Since March 2017.	Vice President, U.S. Bancorp Fund Services, LLC, since June 2006.	Not Applicable.	Not Applicable.
	Treasurer	Indefinite Term; Since August 2016.			
Melissa Breitzman (born 1983) c/o U.S. Bancorp Fund Services, LLC 615 East Michigan St. Milwaukee, WI 53202	Assistant Treasurer	Indefinite Term; Since August 2016.	Assistant Vice President, U.S. Bancorp Fund Services, LLC, since June 2005.	Not Applicable.	Not Applicable.
Craig Benton (born 1985) c/o U.S. Bancorp Fund Services, LLC 615 East Michigan St. Milwaukee, WI 53202	Assistant Treasurer	Indefinite Term; Since August 2016	Assistant Vice President, U.S. Bancorp Fund Services, LLC, since November 2007.	Not Applicable.	Not Applicable.
Cory Akers (born 1978) c/o U.S. Bancorp Fund Services, LLC 615 East Michigan St. Milwaukee, WI 53202	Assistant Treasurer	Indefinite Term; Since August 2017.	Assistant Vice President, U.S. Bancorp Fund Services, LLC since November 2007.	Not Applicable.	Not Applicable.
Donna Barrette (born 1966) c/o U.S. Bancorp Fund Services, LLC 615 East Michigan St. Milwaukee, WI 53202	Chief Compliance Officer	Indefinite Term: Since July 2011.	Senior Vice President and Compliance Officer, U.S. Bancorp Fund Services, LLC since August 2004.	Not Applicable.	Not Applicable.
	Anti-Money Laundering Officer	Indefinite Term: Since July 2011.			
	Vice President	Indefinite Term: Since July 2011.			

(1) The Trustees of the Trust who are not “interested persons” of the Trust as defined under the 1940 Act (“Independent Trustees”).

(2) The Trust is comprised of numerous series managed by unaffiliated investment advisors. The term “Fund Complex” applies to the Funds. The Funds do not hold themselves out as related to any other series within the Trust, for purposes of investment and investor services, nor do they share the same investment advisor with any other series.

Additional Information Concerning the Board of Trustees

The Role of the Board

The Board oversees the management and operations of the Trust. Like all mutual funds, the day-to-day management and operation of the Trust is the responsibility of the various service providers to the Trust, such as the Advisor, the Distributor, the Administrator, the Custodian, and the Transfer Agent, each of whom are discussed in greater detail in this Statement of Additional Information. The Board has appointed various senior employees of the Administrator as officers of the Trust, with responsibility to monitor and report to the Board on the Trust's operations. In conducting this oversight, the Board receives regular reports from these officers and the service providers. For example, the Treasurer reports as to financial reporting matters and the President reports as to matters relating to the Trust's operations. In addition, the Advisor provides regular reports on the investment strategy and performance of the Fund. The Board has appointed a Chief Compliance Officer who administers the Trust's compliance program and regularly reports to the Board as to compliance matters. These reports are provided as part of formal "Board Meetings" which are typically held quarterly, in person, and involve the Board's review of recent operations. In addition, various members of the Board also meet with management in less formal settings, between formal "Board Meetings," to discuss various topics. In all cases, however, the role of the Board and of any individual Trustee is one of oversight and not of management of the day-to-day affairs of the Trust and its oversight role does not make the Board a guarantor of the Trust's investments, operations or activities.

Board Structure, Leadership

The Board has structured itself in a manner that it believes allows it to perform its oversight function effectively. It has established three standing committees, a Nominating Committee, an Audit Committee and a Qualified Legal Compliance Committee, which are discussed in greater detail below under "Trust Committees". The Board is comprised of Trustees who are all Independent Trustees, which are Trustees that are not affiliated with the Advisor, the principal underwriter, or their affiliates. The Nominating Committee, Audit Committee and Qualified Legal Compliance Committee are comprised entirely of Independent Trustees. The Chairman of the Board is an Independent Trustee. The Board has determined not to combine the Chairman position and the principal executive officer position and has appointed a Vice President of the Administrator as the President of the Trust. The Board reviews its structure and the structure of its committees annually. The Board has determined that the structure of the Independent Chairman, the composition of the Board, and the function and composition of its various committees are appropriate means to address any potential conflicts of interest that may arise.

Board Oversight of Risk Management

As part of its oversight function, the Board of Trustees receives and reviews various risk management reports and discusses these matters with appropriate management and other personnel. Because risk management is a broad concept comprised of many elements (*e.g.*, investment risk, issuer and counterparty risk, compliance risk, operational risks, business continuity risks, etc.), the oversight of different types of risks is handled in different ways. For example, the Audit Committee meets with the Treasurer and the Trust's independent registered public accounting firm to discuss, among other things, the internal control structure of the Trust's financial reporting function. The Board meets regularly with the Chief Compliance Officer to discuss compliance and operational risks and how they are managed. The Board also receives reports from the Advisor as to investment risks of the Fund. In addition to these reports, from time to time the Board receives reports from the Administrator and the Advisor as to enterprise risk management.

Information about Each Trustee's Qualification, Experience, Attributes or Skills

The Board believes that each of the Trustees has the qualifications, experience, attributes and skills ("Trustee Attributes") appropriate to their continued service as Trustees of the Trust in light of the Trust's business and structure. In addition to a demonstrated record of business and/or professional accomplishment, each of the Trustees has served on the Board for a number of years. They have substantial board experience and, in their service to the Trust, have gained substantial insight as to the operation of the Trust. They have demonstrated a commitment to discharging their oversight duties as trustees in the interests of shareholders. The Board annually conducts a "self-assessment" wherein the effectiveness of the Board and individual Trustees is reviewed.

In addition to the information provided in the chart above, below is certain additional information concerning each particular Trustee and his/her Trustee Attributes. The information is not all-inclusive. Many Trustee Attributes involve intangible elements, such as intelligence, integrity, work ethic, the ability to work together, the ability to communicate effectively, the ability to exercise judgment, to ask incisive questions, and commitment to shareholder interests.

Ms. Berry's Trustee Attributes include her substantial mutual fund experience, including her role as a member of the Board of Governors of the Investment Company Institute and its Executive Committee. She was also a member of the Independent Directors Council and served two terms as its Chairman. She has executive experience as the President (retired) of Talon Industries, Inc. (a business consulting company) and through her former positions as the Executive Vice President and Chief Operating Officer of Integrated Asset Management (an investment advisor and manager) and as the President of Value Line, Inc. (an investment advisory and financial publishing firm). Ms. Berry also serves on the board of another investment management company. Ms. Berry has been determined to qualify as an Audit Committee financial expert for the Trust. The Board believes Ms. Berry's experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees led to the conclusion that she possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Cook's Trustee Attributes include his investment and executive experience through his investment consulting business and former Chief Executive Officer of Rockefeller Trust Company (an investment manager and financial advisor). He has substantial board experience, serving on the board of several foundations. Mr. Cook has been determined to qualify as an Audit Committee financial expert for the Trust. The Board believes Mr. Cook's experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees led to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Falkeis' Trustee Attributes include his substantial mutual fund experience and his experience with financial, accounting, investment and regulatory matters through his former position as Senior Vice President and Chief Financial Officer (and other positions) of U.S. Bancorp Fund Services, LLC, a full service provider to mutual funds and alternative investment products. In addition, he has experience consulting with investment advisors regarding the legal structure of mutual funds, distribution channel analysis and actual distribution of those funds. Mr. Falkeis also has substantial managerial, operational and risk oversight experience through his former position as Chief Operating Officer of the Direxion Funds and the Direxion Exchange Traded Funds. Mr. Falkeis has been determined to qualify as an Audit Committee financial expert for the Trust. The Board believes Mr. Falkeis' experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees led to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Froebel's Trustee Attributes include his significant systems and operations experience. He was a Director of Scudder, Stevens & Clark (with responsibility for its systems department) and founder and President of Systems Dynamics Corp. ("SDC") and later Vice President of Bradford Computer & Systems after its acquisition of SDC, (providing record keeping and reporting for investment advisors and mutual funds). He also served as Vice President of Automatic Data Processing (automated services to the brokerage and investment advisory industry) and was the former President and founder of National Investor Data Services, Inc. (a software and computer vendor to the mutual fund industry with fund accounting and transfer agent systems). Mr. Froebel has been determined to qualify as an Audit Committee financial expert for the Trust. The Board believes Mr. Froebel's experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees led to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Paggioli's Trustee Attributes include his substantial mutual fund and investment advisory experience. Mr. Paggioli is an independent consultant on investment company and investment advisory matters. He has held a number of senior positions with mutual fund and investment advisory organizations and related businesses, including Executive Vice President, Director and Principal of the Wadsworth Group (fund administration, distribution transfer agency and accounting services). He serves on the boards of several investment management companies and advisory firms. He has served on various industry association and self-regulatory committees and formerly worked on the staff of the Securities and Exchange Commission. Mr. Paggioli has been determined to qualify as an Audit Committee financial expert for the Trust. The Board believes Mr. Paggioli's experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees led to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Trust Committees

The Trust has three standing committees: the Nominating Committee and the Audit Committee, which also serves as the Qualified Legal Compliance Committee ("QLCC").

The Nominating Committee, comprised entirely of Independent Trustees, is responsible for seeking and reviewing candidates for consideration as nominees for Trustees and meets only as necessary. The Nominating Committee will consider nominees nominated by shareholders. Recommendations by shareholders should be sent to the President of the Trust in writing together with the appropriate biographical information concerning each such proposed Nominee, and such recommendation must comply with the notice provisions set forth in the Trust By-Laws. In general, to comply with such procedures, such nominations, together with all required biographical information, must be delivered to, and received by, the President of the Trust at the principal executive offices of the Trust not later than 120 days and no more than 150 days prior to the shareholder meeting at which any such nominee would be voted on. The Nominating Committee did not meet with respect to the Funds during its fiscal year ended December 31, 2017.

The Audit Committee is comprised entirely of Independent Trustees. The Audit Committee typically meets on a quarterly basis with respect to each series of the Trust and may meet more frequently. The function of the Audit Committee, with respect to each series of the Trust, is to review the scope and results of the audit and any matters bearing on the audit or a fund's financial statements and to ensure the integrity of a fund's pricing and financial reporting. The Audit Committee met once with respect to the Funds during their fiscal year ended December 31, 2017.

The function of the QLCC is to receive reports from an attorney retained by the Trust of evidence of a material violation by the Trust or by any officer, director, employee or agent of the Trust. The QLCC did not meet with respect to the Fund during its fiscal year ended December 31, 2017.

Additionally, the Board has delegated day-to-day valuation issues to a Valuation Committee that is comprised of certain officers of the Trust and overseen by the Independent Trustees. The function of the Valuation Committee is to value securities held by any series of the Trust for which current and reliable market quotations are not readily available. Such securities are valued at their respective fair values as determined in good faith by the Valuation Committee, and the actions of the Valuation Committee are subsequently reviewed and ratified by the Board. The Valuation Committee meets as needed. The Valuation Committee met four times with respect to the Credit Opportunities Fund and the Low Duration Fund and met once with respect to the U.S. High Yield Fund during its fiscal year ended December 31, 2017.

Trustee Ownership of Fund Shares and Other Interests

The following table shows the amount of shares in the Funds and the amount of shares in other portfolios of the Trust owned by the Trustees as of the calendar year ended December 31, 2017.

Name	Dollar Range of Credit Opportunities Fund Shares	Dollar Range of High Yield Fund Shares	Dollar Range of Low Duration Fund Shares	Aggregate Dollar Range of Fund Shares in the Trust
Dorothy A. Berry	None	None	None	\$50,001-\$100,000
Wallace L. Cook	None	None	None	Over \$100,000
Eric W. Falkeis	Over \$100,000	None	None	Over \$100,000
Carl A. Froebel	None	None	None	Over \$100,000
Steven J. Paggioli	None	None	None	Over \$100,000

Furthermore, neither the Independent Trustees nor members of their immediate family, own securities beneficially or of record in the Advisor, the Funds' principal underwriter, or any of their affiliates. Accordingly, during the two most recently completed calendar years, neither the Independent Trustees nor members of their immediate family, have had a direct or indirect interest, the value of which exceeds \$120,000, in the Advisor, the Funds' principal underwriter or any of its affiliates.

Compensation

The Independent Trustees each receive an annual retainer of \$125,000 allocated among each of the various portfolios comprising the Trust. The Chairman of the Board receives an additional annual retainer of \$20,000 also allocated among each of the various portfolios comprising the Trust. Independent Trustees receive additional fees from applicable portfolios for any special meetings at rates assessed by the Trustees depending on the length of the meeting and whether in-person attendance is required. All Trustees will be reimbursed for expenses in connection with each Board meeting attended, which reimbursement is allocated among applicable portfolios of the Trust. The Trust has no pension or retirement plan. No other entity affiliated with the Trust pays any compensation to the Trustees.

Set forth below is the compensation received by the following Independent Trustees for the Funds for the fiscal year ended December 31, 2017. The High Income Floating Rate Fund has not commenced operations as of the date of this SAI.

Name of Person/Position	Credit Opportunities Fund	U.S. High Yield Fund ⁽²⁾	Low Duration Fund	Floating Rate Fund ⁽²⁾	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from Fund and Fund Complex ⁽¹⁾ Paid to Trustees
Dorothy A. Berry, Trustee	\$3,777	\$2,910	\$3,952	None	None	None	\$10,639
Wallace L. Cook, Trustee	\$3,127	\$2,259	\$3,302	None	None	None	\$8,688
Eric W. Falkeis, Trustee	\$3,127	\$2,259	\$3,302	None	None	None	\$8,688
Carl A. Froebel, Trustee	\$3,127	\$2,259	\$3,302	None	None	None	\$8,688
Steve J. Paggioli, Trustee	\$3,127	\$2,259	\$3,302	None	None	None	\$8,688

(1) There are currently numerous portfolios comprising the Trust. The term “Fund Complex” applies only to the Funds. For the fiscal year ended December 31, 2017, cumulative Trustees’ fees and expenses were received in the amount of \$645,000.

(2) There was no compensation for the Floating Rate Fund for the fiscal year ended December 31, 2017, since the Fund had not commenced operations prior to the fiscal year end.

Investment Advisor

Muzinich & Co., Inc., 450 Park Avenue, New York, New York 10022 serves as investment advisor to each Fund pursuant to investment advisory agreements with the Trust (each an “Advisory Agreement”). Under the applicable Advisory Agreement, the Advisor furnishes, at its own expense, all services, facilities and personnel necessary in connection with managing each Fund’s investments and effecting portfolio transactions for each Fund. The Advisor may also pay fees to certain brokers/dealers to have the Funds available for sale through such institutions as well for certain shareholder services provided to customers purchasing Fund shares through such institutions. Muzinich is completely independent and is controlled by members of the Muzinich family.

Information Regarding Portfolio Managers

The following information regarding each Fund’s portfolio managers has been provided by the Advisor.

Other Accounts Under Management. The table below identifies, for each portfolio manager of each Fund, the number of accounts managed (excluding the Funds) and the total assets in such accounts, within each of the following categories: registered investment companies, other pooled investment vehicles, and other accounts. To the extent that any of these accounts are based on account performance, this information is

reflected in separate tables below. Information in the table is shown as of December 31, 2017. Asset amounts are approximate and have been rounded.

<u>Portfolio Manager</u>	<u>Registered Investment Companies (excluding the Funds)</u>		<u>Other Pooled Investment Vehicles</u>		<u>Other Accounts</u>

Conflicts of Interest for Portfolio Managers

Each of Muzinich’s portfolio managers may also manage mutual funds other than the Funds covered by this SAI and multiple institutional accounts. Some of the other mutual funds and separate accounts are managed similarly to the Funds that are covered by this SAI, except to the extent required by differences in cash flow, investment policy or law. The side-by-side management of the Funds and the other accounts presents a variety of potential conflicts of interest. For example, the portfolio manager may purchase or sell securities for one portfolio and not another portfolio, and the performance of securities purchased for one portfolio may vary from the performance of securities purchased for other portfolios. The portfolio managers may also want to buy the same security for one or more of the Funds that they manage or a Fund and a non-fund account. In some cases, there may not be sufficient amounts of the securities available to cover the needs of all the accounts managed by Muzinich. Muzinich endeavors to treat all clients fairly and provide high quality investment services. As a result, Muzinich has adopted and implemented policies and procedures, including brokerage and trade allocation policies and procedures which it believes address the conflicts associated with managing multiple accounts of different types with similar and dissimilar investment objectives and guidelines. Where potential conflicts exist, Muzinich generally has adopted objective procedures that limit the ability of the firm to subjectively favor one client over another, or to favor the firm over a client.

Information Concerning Compensation of Portfolio Managers

Muzinich offers a compensation system with incentives designed to stimulate individual and firm-wide performance. The firm provides salaries that are augmented through a profit sharing bonus system, the relative weighting of which varies each year with firm and individual performance. For the portfolio managers, the relative performance of portfolios managed by them as compared to the market (as applicable to each account and its benchmarks) is a significant factor in the determination of their bonus.

Muzinich typically pays out a substantial percentage of its net profits in employee compensation. Accordingly, all members of the firm are highly incentivized to grow the firm’s profits through both portfolio performance and success of the firm as a whole.

For all employees, including portfolio managers, individual performance is considered not only within a professional’s immediate responsibilities (*e.g.*, an analyst’s investment recommendations), but also in relation to an individual’s positive contribution to the firm as a whole. Understanding that all of the firm’s portfolios are managed on a team basis, all team members benefit directly from the success of the investment management effort across all products.

Employees’ greatest financial reward should always come from the long-term success of firm clients and the extended profitability of the firm as a whole, rather than from shorter-term success.

Portfolio Managers Ownership in the Funds. The following indicates the beneficial ownership of the Portfolio Managers of each Fund as of December 31, 2017:

Amount Invested Key

- A. None
- B. \$1-\$10,000
- C. \$10,001-\$50,000
- D. \$50,001-\$100,000
- E. \$100,001-\$500,000
- F. \$500,001-\$1,000,000
- G. Over \$1,000,000

⁽¹⁾ The Floating Rate Fund has not commenced operations as of the date of this SAI.

Fees

The Advisor's fee is calculated as a percentage of each Fund's average daily net assets. The fee, if not waived, is accrued daily by each Fund and is assessed to each class based on average net assets for the previous month. The Advisor's fee is paid monthly based on average net assets for the prior month.

In addition to receiving its advisory fee from each Fund, the Advisor may also act and be compensated as investment manager for its clients with respect to assets clients invested in each Fund. If you have a separately managed account with the Advisor with assets invested in a Fund, the Advisor will credit an amount equal to all or a portion of the fees received by the Advisor against any investment management fee received from you.

The Advisor may also receive compensation from certain omnibus account providers for providing shareholder services to Fund shareholders.

The Credit Opportunities Fund paid the following fees to the Advisor for the fiscal years shown:

Credit Opportunities Fund	Fiscal Year Ended December 31, 2017	Fiscal Year Ended December 31, 2016	Fiscal Year Ended December 31, 2015
Advisory Fee Accrued	\$1,956,304	\$1,226,829	\$708,394
Fees waived and expenses absorbed by Advisor ⁽¹⁾	\$770,603	\$498,503	\$354,662
Total Fees Paid to the Advisor	\$1,185,701	\$728,326	\$353,732

The U.S. High Yield Fund paid the following fees to the Advisor for the fiscal period shown:

U.S. High Yield Fund	Fiscal Year Ended December 31, 2017	Fiscal Period Ended December 31, 2016⁽¹⁾
Advisory Fee Accrued	\$335,509	\$64,165
Fees waived and expenses absorbed by Advisor ⁽²⁾	\$282,569	\$145,340
Total Fees Paid to the Advisor	\$52,940	\$0

⁽¹⁾ The U.S. High Yield Fund commenced operations on March 31, 2016.

⁽²⁾ In addition to waiving all of its advisory fees in 2016, the Advisor paid \$81,175 of other fund expenses.

The Low Duration Fund paid the following fees to the Advisor for the fiscal period shown:

Low Duration Fund	Fiscal Year Ended December 31, 2017	Fiscal Year Ended December 31, 2016⁽¹⁾
Advisory Fee Accrued	\$1,935,201	\$175,410
Fees waived and expenses absorbed by Advisor ⁽²⁾	\$887,946	\$178,907
Total Fees Paid to the Advisor	\$1,047,255	\$0

⁽¹⁾ The Low Duration Fund commenced operations on June 30, 2016.

⁽²⁾ In addition to waiving all of its advisory fees in 2016, the Advisor paid \$3,497 of other fund expenses.

The Floating Rate Fund has not yet commenced operations.

Other Provisions of Advisory Agreement

The Advisor is not affiliated with USBFS or any company affiliated with USBFS. The Advisory Agreement is initially in effect for a period of two years from the date of its effectiveness. Subsequently, the Advisory Agreement must be approved at least annually by the Board or by majority vote of the shareholders, and in either case by a majority of the Trustees who are not parties to the agreements or interested persons of any such party (other than as Trustees of the Trust).

The Advisory Agreement is terminable without penalty by the Trust with respect to a Fund on 60 days' written notice when authorized either by vote of the Fund's shareholders or by a majority vote of the Board, or by the Advisor on 60 days' written notice to the Trust. Each Advisory Agreement terminates immediately upon assignment.

Under each Advisory Agreement, the Advisor is not liable for any error of judgment, mistake of law, or in any event whatsoever except for willful misfeasance, bad faith or gross negligence in the performance of its duties or by reason of reckless disregard of its obligations and duties under the agreement.

In consideration of the services provided by the Advisor pursuant to the Investment Advisory Agreement, the Advisor is entitled to receive from the Funds an investment advisory fee computed daily and paid monthly, based on a rate equal to 0.60% of the Credit Opportunities Fund's, 0.55% of the U.S. High Yield

Fund's and Floating Rate Fund's, and 0.45% of the Low Duration Fund's average daily net assets as specified in each Fund's Prospectus. However, the Advisor may voluntarily agree to reduce a portion of the fees payable to it on a month to month basis.

The Funds are responsible for their own operating expenses. The Advisor has contractually agreed to reduce fees and/or pay Fund expenses (excluding Acquired Fund Fees and Expense, interest expense in connection with investment activities, tax, and extraordinary expenses) in order to limit the Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement for shares of the Credit Opportunities Fund to 0.95%, 0.70% and 0.60% of the Fund's Class A, Institutional Class and Supra Institutional Class shares' average net assets, respectively (the "Expense Caps"). The Expense Caps for the U.S. High Yield Fund are 0.93%, 0.68% and 0.58% of the Fund's Class A, Institutional Class and Supra Institutional Class shares' average net assets, respectively. The Expense Caps for the Low Duration Fund are 0.85%, 0.60% and 0.50% of the Fund's Class A, Institutional Class and Supra Institutional Class shares' average net assets, respectively. The Expense Caps for the Floating Rate Fund are 1.05%, 0.70% and 0.60% of the Fund's Class A, Institutional Class and Supra Institutional Class shares' average net assets, respectively. The Expense Caps are indefinite, but will remain in effect until at least April 30, 2019, and may continue thereafter as determined by the Board. The Advisor is permitted, with Board approval, to be reimbursed for fee reductions and/or expenses payments made in the prior three years from the date the fees were waived and expenses were paid. This reimbursement may be requested if the aggregate amount actually paid by the Fund toward operating expenses for such period (taking into account any reimbursement) does not exceed the lesser of the Expense Cap in place at the time of the waiver or at the time of reimbursement.

Other Fund Service Providers

Administrator and Accountant

USBFS, 615 East Michigan Street, Milwaukee, Wisconsin 53202, acts as administrator to the Funds pursuant to an administration agreement (the "Administration Agreement"). USBFS provides certain administrative services to the Funds, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Funds' independent contractors and agents; preparation for signature by an officer of the Trust of all documents required to be filed for compliance by the Trust and the Funds with applicable laws and regulations excluding those of the securities laws of various states; arranging for the computation of performance data, including NAV and yield; responding to shareholder inquiries; and arranging for the maintenance of books and records of the Funds, and providing, at its own expense, office facilities, equipment and personnel necessary to carry out its duties. In this capacity, USBFS does not have any responsibility or authority for the management of the Funds, the determination of investment policy, or for any matter pertaining to the distribution of Fund shares.

Pursuant to the Administration Agreement, the Administrator will receive a portion of fees from the Funds as part of a bundled-fees agreement for services performed as Administrator, fund accountant and transfer agent. Additionally, USBFS provides Chief Compliance Officer services to the Trust under a separate agreement. The cost for the Chief Compliance Officer's services is charged to the Funds and approved by the Board annually.

For the fiscal period ended December 31, USBFS received the following amounts as compensation with respect to the Funds for its services as Fund Administrator and Accountant:

Administration Fees Paid by Credit Opportunities Fund	
Fiscal Year Ended December 31, 2017	\$203,118
Fiscal Year Ended December 31, 2016	\$135,065
Fiscal Year Ended December 31, 2015	\$88,149
Administration Fees Paid by U.S. High Yield Fund	
Fiscal Year Ended December 31, 2017	\$59,467
March 31, 2016* to December 31, 2016	\$15,279
Administration Fees Paid by Low Duration Fund	
Fiscal Year Ended December 31, 2017	\$192,892
June 30, 2016* to December 31, 2016	\$23,987

*Commencement of operations.

The Floating Rate Fund has not yet commenced operations.

Custodian

U.S. Bank National Association is the Custodian for the Funds and safeguards and controls the Funds' cash and securities, determines income and collects interest on Fund investments. The Custodian's address is 1555 North RiverCenter Drive, Suite 302, Milwaukee, Wisconsin 53212. The Custodian does not participate in decisions relating to the purchase and sale of securities by the Funds. USBFS, U.S. Bank National Association, and the Funds' principal underwriter are affiliated entities under the common control of U.S. Bancorp. The Custodian and its affiliates may participate in revenue sharing arrangements with the service providers of mutual funds in which the Funds may invest.

Legal Counsel

Schiff Hardin LLP, 666 Fifth Avenue, Suite 1700, New York, New York 10103 serves as legal counsel to the Trust.

Independent Registered Public Accounting Firm

Tait, Weller & Baker LLP, 1818 Market Street, Suite 2400, Philadelphia, Pennsylvania 19103 is the Funds' independent registered public accounting firm, providing audit services, tax services and assistance with respect to the preparation of filings with the U.S. Securities and Exchange Commission.

PORTFOLIO TRANSACTIONS

How Securities are Purchased and Sold

Purchases and sales of portfolio securities that are fixed income securities (for instance, money market instruments and bonds, notes and bills) usually are principal transactions. In a principal transaction, the party from whom a Fund purchases or to whom a Fund sells is acting on its own behalf (and not as the agent of some other party such as its customers). These securities normally are purchased directly from the issuer or from an underwriter or market maker for the securities. There usually are no brokerage commissions paid for these securities.

Purchases and sales of portfolio securities that are equity securities (for instance common stock and preferred stock) are generally effected: (1) if the security is traded on an exchange, through brokers who charge commissions; and (2) if the security is traded in the “over-the-counter” markets, in a principal transaction directly from a market maker. In transactions on stock exchanges, commissions are negotiated. When transactions are executed in an over-the-counter market, the Advisor will seek to deal with the primary market makers; but when necessary in order to obtain best execution, the Advisor will utilize the services of others.

The price of securities purchased from underwriters includes a disclosed fixed commission or concession paid by the issuer to the underwriter, and prices of securities purchased from dealers serving as market makers reflects the spread between the bid and asked price.

In the case of fixed income and equity securities traded in the over-the-counter markets, there is generally no stated commission, but the price usually includes an undisclosed commission or markup.

Advisor Responsibility for Purchases and Sales

The Advisor places orders for the purchase and sale of securities with broker-dealers selected by and in the discretion of the Advisor. The Fund does not have any obligation to deal with a specific broker or dealer in the execution of portfolio transactions. Allocations of transactions to brokers and dealers and the frequency of transactions are determined by the Advisor in its best judgment and in a manner deemed to be in the best interest of each Fund rather than by any formula.

The Advisor seeks “best execution” for all portfolio transactions. This means that the Advisor seeks the most favorable price and execution available. The Advisor’s or Sub-Advisor’s primary consideration in executing transactions for the Fund is prompt execution of orders in an effective manner and at the most favorable price available.

Choosing Broker-Dealers

The Fund may not always pay the lowest commission or spread available. Rather, in determining the amount of commissions (including certain dealer spreads) paid in connection with securities transactions, the Advisor takes into account factors such as size of the order, difficulty of execution, efficiency of the executing broker’s facilities (including the research services described below) and any risk assumed by the executing broker.

Consistent with applicable rules and the Advisor’s duties, the Advisor may consider payments made by brokers effecting transactions for a Fund. These payments may be made to a Fund or to other persons on behalf of a Fund for services provided to a Fund for which those other persons would be obligated to pay.

The Advisor may also utilize a broker and pay a slightly higher commission or price if, for example, the broker has specific expertise in a particular type of transaction (due to factors such as size or difficulty), or it is efficient in trade execution.

The Fund may also be prohibited from placing trades with certain brokers if those brokers should become affiliates of the Fund, for example, through significant investments by their clients in the Fund—even if such broker could otherwise provide “best execution” with regard to a particular trade, and may be doing so on behalf of other accounts or Funds advised by the Advisor.

For the fiscal years shown below, the Credit Opportunities Fund paid aggregate brokerage commissions in the amount of:

	Aggregate Brokerage Commissions
Fiscal Year Ended December 31, 2017	\$4,665
Fiscal Year Ended December 31, 2016	\$10,705
Fiscal Year Ended December 31, 2015	\$4,990

For the fiscal period shown below, the U.S. High Yield Fund paid aggregate brokerage commissions in the amount of:

	Aggregate Brokerage Commissions
Fiscal Year Ended December 31, 2017	\$19,181
March 31, 2016* to December 31, 2016	\$37,821

For the fiscal period shown below, the Low Duration Fund paid aggregate brokerage commissions in the amount of:

	Aggregate Brokerage Commissions
Fiscal Year Ended December 31, 2017	\$436
June 30, 2016* to December 31, 2016	\$442

*Commencement of operations.

The Floating Rate Fund has not yet commenced operations.

Obtaining Research from Brokers

The Advisor has full brokerage discretion. The Advisor evaluates the range and quality of a broker's services in placing trades such as securing best price, confidentiality, clearance and settlement capabilities, promptness of execution and the financial stability of the broker-dealer. The Advisor may give consideration to research services furnished by brokers to the Advisor for its use and may cause a Fund to pay these brokers a higher amount of commission than may be charged by other brokers. This research is designed to augment the Advisor's own internal research and investment strategy capabilities. This research may include reports that are common in the industry such as industry research reports and periodicals, quotation systems, software for portfolio management and formal databases. Typically, the research will be used to service all of the Advisor accounts, although a particular client may not benefit from all the research received on each occasion. The Advisor fees are not reduced by reason of receipt of research services.

Effective January 2018, pursuant to the second Markets in Financial Instruments Directive ("MiFID II"), investment managers in the European Union ("EU"), including a segment of the operations of the Advisor, are required to either pay for research out of their own resources or agree with clients to have research costs paid by clients through research payment accounts that are funded out of trading commissions or by a specific client research charge, provided that the payments for research are unbundled from the payments for execution. Where such a restriction applies, the Adviser will pay for any research out of its own resources and not through soft dollars or CCAs. Additionally, MiFID II may have practical ramifications outside the EU. For example, U.S. asset managers acting under the delegated authority of an EU-based asset manager and U.S. asset managers that are part of a global asset management group with one or more EU affiliates may, in practice, have to restructure the way they procure, value and pay for research under U.S. laws and regulations to more closely align with the requirements under MiFID II. It is difficult to

predict the full impact of MiFID II on the Funds and the Advisor, but it could increase the overall costs of entering into investments, increase the overall price of research and/or reduce access to research.

Counterparty Risk

The Advisor monitors the creditworthiness of counterparties to each Fund's transactions and intends to enter into a transaction only when it believes that the counterparty presents minimal and appropriate credit risks.

Other Accounts of the Advisor

Investment decisions for the Funds are made independently from those for any other account or investment company that is or may in the future become advised by the Advisor or its affiliates. Investment decisions are the product of many factors, including basic suitability for the particular client involved. Likewise, a particular security may be bought or sold for certain clients even though it could have been bought or sold for other clients at the same time. Likewise, a particular security may be bought for one or more clients when one or more clients are selling the security. In some instances, one client may sell a particular security to another client. In addition, two or more clients may simultaneously purchase or sell the same security, in which event, each day's transactions in such security are, insofar as is possible, averaged as to price and allocated between such clients in a manner which, in the Advisor's opinion, is in the best interest of the affected accounts and is equitable to each and in accordance with the amount being purchased or sold by each. There may be circumstances when purchases or sales of a portfolio security for one client could have an adverse effect on another client that has a position in that security. In addition, when purchases or sales of the same security for the Fund and other client accounts managed by the Advisor occurs contemporaneously, the purchase or sale orders may be aggregated in order to obtain any price advantages available to large denomination purchases or sales.

Portfolio Turnover

The frequency of portfolio transactions of each Fund (the portfolio turnover rate) will vary from year to year depending on many factors. From time to time, a Fund may engage in active short-term trading to take advantage of price movements affecting individual issues, groups of issues or markets. An annual portfolio turnover rate of 100% would occur if all the securities in a Fund were replaced once in a period of one year. Higher portfolio turnover rates may result in increased brokerage costs to a Fund and a possible increase in short-term capital gains or losses. Each Fund's annual portfolio turnover rates for the last five years will be included in the "Financial Highlights" section of the Funds' prospectus.

Following is the Credit Opportunities Fund's portfolio turnover rate for the two most recent fiscal years:

Portfolio Turnover Rate	
Year ended December 31, 2017	135%
Year ended December 31, 2016	260%

Following is the U.S. High Yield Fund's portfolio turnover rate for the most recent fiscal period:

Portfolio Turnover Rate	
Year ended December 31, 2017	120%
Period ended December 31, 2016*	140%

*The Fund commenced operations on March 31, 2016.

Following is the Low Duration Fund's portfolio turnover rate for the most recent fiscal period:

Portfolio Turnover Rate

Year ended December 31, 2017	57%
Period ended December 31, 2016*	7%

*The Fund commenced operations on June 30, 2016.

The Floating Rate Fund has not yet commenced operations.

Securities of Regular Broker-Dealers

From time to time, a Fund may acquire and hold securities issued by its “regular brokers and dealers” or the parents of those brokers and dealers. For this purpose, regular brokers and dealers are the 10 brokers or dealers that: (1) received the greatest amount of brokerage commissions during a Fund’s last fiscal year; (2) engaged in the largest amount of principal transactions for portfolio transactions of a Fund during the Fund’s last fiscal year; or (3) sold the largest amount of a Fund’s shares during the Fund’s last fiscal year.

During the fiscal year ended December 31, 2017, the following Fund acquired or held securities issued by its regular brokers or dealers in the following amounts:

Low Duration Fund

<u>Broker or Dealer</u>	<u>Amount</u>
Morgan Stanley	\$3,190,324

During the fiscal year ended December 31, 2017, the Credit Opportunities Fund and U.S. High Yield Fund did not acquire or hold securities issued by their regular brokers or dealers.

The Floating Rate Fund has not yet commenced operations.

Portfolio Holdings

The Trust, on behalf of the Funds, has adopted a portfolio holdings disclosure policy that governs the timing and circumstances of disclosure of portfolio holdings of each Fund. The Advisor has also adopted a policy with respect to disclosure of portfolio holdings of each Fund (the “Advisor’s Policy”). Information about each Fund’s portfolio holdings will not be distributed to any third party except in accordance with the portfolio holdings policies and the Advisor’s Policy (the “Disclosure Policies”). The Advisor and the Board considered the circumstances under which each Fund’s portfolio holdings may be disclosed under the Disclosure Policies and the actual and potential material conflicts that could arise in such circumstances between the interests of a Fund’s shareholders and the interests of the Advisor, distributor or any other affiliated person of a Fund. After due consideration, the Advisor and the Board determined that each Fund has a legitimate business purpose for disclosing portfolio holdings to persons described in the Disclosure Policies, including mutual fund rating or statistical agencies, or persons performing similar functions, and internal parties involved in the investment process, administration or custody of a Fund. Pursuant to the Disclosure Policies, the Trust’s Chief Compliance Officer (“CCO”), President and Treasurer are each authorized to consider and authorize dissemination of portfolio holdings information to additional third parties, after considering the best interests of each Fund’s shareholders and potential conflicts of interest in making such disclosures.

The Board exercises continuing oversight of the disclosure of each Fund’s portfolio holdings by (1) overseeing the implementation and enforcement of the Disclosure Policies, Codes of Ethics and other relevant policies of the Fund and its service providers by the Trust’s CCO, (2) by considering reports and recommendations by the Trust’s CCO concerning any material compliance matters (as defined in Rule 38a-1 under the 1940 Act), and (3) by considering to approve any amendment to the Disclosure

Policies. The Board reserves the right to amend the Disclosure Policies at any time without prior notice to shareholders in its sole discretion.

Disclosure of each Fund's complete holdings is required to be made after the periods covered by the Funds' Annual Report and Semi-Annual Report to Fund shareholders and in the quarterly holdings report on Form N-Q. These reports are available, free of charge, on the EDGAR database on the SEC's website at www.sec.gov. The Funds disclose their complete portfolio holdings on their website at www.MuzinichUSFunds.com within 10 business days after the calendar month-end. Portfolio holdings information posted on the Funds' website may be separately provided to any person, commencing on the day after it is first published on the Funds' website. In addition, each Fund may provide its complete portfolio holdings at the same time that it is filed with the SEC.

In the event of a conflict between the interests of a Fund and the interests of the Advisor or an affiliated person of the Advisor, the CCO of the Advisor, in consultation with the Trust's CCO, shall make a determination in the best interests of the Fund, and shall report such determination to the Board at the end of the quarter in which such determination was made. Any employee of the Advisor who suspects a breach of this obligation must report the matter immediately to the Advisor's CCO or to his or her supervisor.

In addition, material non-public holdings information may be provided without lag as part of the normal investment activities of a Fund to each of the following entities, which, by explicit agreement or by virtue of their respective duties to the Fund, are required to maintain the confidentiality of the information disclosed, including a duty not to trade on non-public information: the fund administrator, fund accountant, custodian, transfer agent, auditors, counsel to the Fund or the Board, broker-dealers (in connection with the purchase or sale of securities or requests for price quotations or bids on one or more securities) and regulatory authorities. Portfolio holdings information not publicly available with the SEC or through the Fund's website may only be provided to additional third parties, including mutual fund ratings or statistical agencies, in accordance with the Disclosure Policies, when a Fund has a legitimate business purpose and the third party recipient is subject to a confidentiality agreement that includes a duty not to trade on non-public information.

In no event shall the Advisor, its affiliates or employees, a Fund, or any other party receive any direct or indirect compensation in connection with the disclosure of information about the Fund's portfolio holdings.

There can be no assurance that the Disclosure Policies will protect the Funds from potential misuse of portfolio holdings information by individuals or entities to which it is disclosed.

From time to time, the Advisor may make additional disclosure of the Funds' portfolio holdings on the Funds' website. Shareholders can access the Funds' website at www.MuzinichUSFunds.com for additional information about the Funds, including, without limitation, the periodic disclosure of their portfolio holdings.

ADDITIONAL PURCHASE AND REDEMPTION INFORMATION

The information provided below supplements the information contained in the Prospectus regarding the purchase and redemption of a Fund's shares.

How to Buy Shares

In addition to purchasing shares directly from the Funds, you may purchase shares of the Funds through certain financial intermediaries and their agents that have made arrangements with a Fund and are authorized to buy and sell shares of the Fund (collectively, "Financial Intermediaries"). Investors should contact their Financial Intermediary directly for appropriate instructions, as well as information pertaining

to accounts and any service or transaction fees that may be charged. If you transmit your order to these Financial Intermediaries before the close of regular trading (generally 4:00 p.m., Eastern time) on a day that the NYSE is open for business, your order will be priced based on the Fund's NAV next computed after it is received by the Financial Intermediary. Investors should check with their Financial Intermediary to determine if it participates in these arrangements.

The public offering price of a Fund's shares is the NAV plus any applicable sales charge. Shares are purchased at the public offering price next determined after USBFS receives your order in proper form, as discussed in the Funds' Prospectus. In order to receive that day's public offering price, USBFS must receive your order in proper form before the close of regular trading on the NYSE, generally 4:00 p.m., Eastern time.

The Trust reserves the right in its sole discretion (i) to suspend the continued offering of a Fund's shares, (ii) to reject purchase orders in whole or in part when in the judgment of the Advisor or the distributor such rejection is in the best interest of a Fund, and (iii) to reduce or waive the minimum for initial and subsequent investments for certain fiduciary accounts or under circumstances where certain economies can be achieved in sales of a Fund's shares.

In addition to cash purchases, a Fund's shares may be purchased by tendering payment in-kind in the form of shares of stock, bonds or other securities. Any securities used to buy a Fund's shares must be readily marketable, their acquisition consistent with each Fund's objective and otherwise acceptable to the Advisor and the Board.

Notice to Non-U.S. Individual Shareholders

Each Fund and its shares are only registered in the United States of America. Regulations outside of the United States may restrict the sale of shares to certain non-U.S. residents or subject certain shareholder accounts to additional regulatory requirements. Each Fund reserves the right, however, to sell shares to certain non-U.S. investors in compliance with applicable law. If a current shareholder in a Fund provides a non-U.S. address, this will be deemed a representation and warranty from such investor that he/she is not a U.S. resident and will continue to be a non-U.S. resident unless and until the Fund is notified of a change in the investor's resident status. Any current shareholder that has a resident address outside of the United States may be restricted from purchasing additional shares.

In the course of its business, each Fund (and/or its service providers) may collect, record, store, adapt, transfer and otherwise process information by which prospective and current natural person investors may be directly or indirectly identified. The Funds shall comply with all applicable data protection regulation in processing personal data, including the EU General Data Protection Regulation (EU/2016/679) (GDPR). For European Union resident shareholders, personal data will be generally processed to open an account, manage and administer holding(s), including further subscriptions, redemptions, transfers or conversions, or otherwise as necessary to comply with the Funds' legal obligations under GDPR.

Automatic Investment Plan

As discussed in the Prospectus, the Funds provide an Automatic Investment Plan ("AIP") for the convenience of investors who wish to purchase shares of a Fund on a regular basis. All record keeping and custodial costs of the AIP are paid by a Fund. The market value of a Fund's shares is subject to fluctuation. Prior to participating in the AIP the investor should keep in mind that this plan does not assure a profit nor protect against depreciation in declining markets.

How to Sell Shares and Delivery of Redemption Proceeds

You can sell your Fund shares any day the NYSE is open for regular trading, either directly to a Fund or through your Financial Intermediary.

Payments to shareholders for shares of a Fund redeemed directly from the Fund will be made as promptly as possible, but no later than seven days after receipt by the Fund's transfer agent of the written request in proper form, with the appropriate documentation as stated in the Prospectus, except that a Fund may suspend the right of redemption or postpone the date of payment during any period when (a) trading on the NYSE is restricted as determined by the SEC or the NYSE is closed for other than weekends and holidays; (b) an emergency exists as determined by the SEC, making disposal of portfolio securities or valuation of net assets of the Fund not reasonably practicable; or (c) for such other period as the SEC may permit for the protection of a Fund's shareholders. Under unusual circumstances, a Fund may suspend redemptions, or postpone payment for more than seven days, but only as authorized by SEC rules.

The value of shares on redemption or repurchase may be more or less than the investor's cost, depending upon the market value of a Fund's portfolio securities at the time of redemption or repurchase.

Telephone Redemptions

Shareholders with telephone transaction privileges established on their account may redeem a Fund's shares by telephone. Upon receipt of any instructions or inquiries by telephone from the shareholder a Fund or its authorized agents may carry out the instructions and/or to respond to the inquiry consistent with the shareholder's previously established account service options. For joint accounts, instructions or inquiries from either party will be carried out without prior notice to the other account owners. In acting upon telephone instructions, a Fund and its agents use procedures that are reasonably designed to ensure that such instructions are genuine. These include recording all telephone calls, requiring pertinent information about the account and sending written confirmation of each transaction to the registered owner.

USBFS will employ reasonable procedures to confirm that instructions communicated by telephone are genuine. If USBFS fails to employ reasonable procedures, a Fund and USBFS may be liable for any losses due to unauthorized or fraudulent instructions. If these procedures are followed, however, that to the extent permitted by applicable law, neither a Fund nor its agents will be liable for any loss, liability, cost or expense arising out of any redemption request, including any fraudulent or unauthorized request. For additional information, contact USBFS.

Redemptions In-Kind

The Trust has elected to be governed by Rule 18f-1 under the 1940 Act so that each Fund is obligated to redeem its shares solely in cash up to the lesser of \$250,000 or 1% of its net asset value during any 90-day period for any shareholder of a Fund. Each Fund has reserved the right to pay the redemption price of its shares in excess of \$250,000 or 1% of its net asset value, either totally or partially, by a distribution in-kind of portfolio securities (instead of cash). The securities so distributed would be valued at the same amount as that assigned to them in calculating the NAV for the shares being sold. If a shareholder receives a distribution in-kind, the shareholder could incur brokerage or other charges in converting the securities to cash and will bear any market risks associated with such securities until they are converted into cash. A redemption in-kind is treated as a taxable transaction and a sale of the redeemed shares, generally resulting in capital gain or loss to you, subject to certain loss limitation rules.

Each Fund does not intend to hold any significant percentage of its portfolio in illiquid securities, although a Fund, like virtually all mutual funds, may from time to time hold a small percentage of securities that are illiquid. In the unlikely event a Fund were to elect to make an in-kind redemption, a Fund expects that it

would follow the normal protocol of making such distribution by way of a pro rata distribution based on its entire portfolio. If a Fund held illiquid securities, such distribution may contain a pro rata portion of such illiquid securities or a Fund may determine, based on a materiality assessment, not to include illiquid securities in the in-kind redemption. Each Fund does not anticipate that it would ever selectively distribute a greater than pro rata portion of any illiquid securities to satisfy a redemption request. If such securities are included in the distribution, shareholders may not be able to liquidate such securities and may be required to hold such securities indefinitely. Shareholders' ability to liquidate such securities distributed in-kind may be restricted by resale limitations or substantial restrictions on transfer imposed by the issuers of the securities or by law. Shareholders may only be able to liquidate such securities distributed in-kind at a substantial discount from their value, and there may be higher brokerage costs associated with any subsequent disposition of these securities by the recipient.

Distributions

Distributions of net investment income will be reinvested at the Fund's NAV (unless you elect to receive distributions in cash) as of the last day of the period with respect to which the distribution is paid. Distributions of capital gain will be reinvested at the NAV of the Fund (unless you elect to receive distributions in cash) on the payment date for the distribution. Cash payments may be made more than seven days following the date on which distributions would otherwise be reinvested. A dividend declared by a Fund in October, November or December to shareholders of record on a specified date in such a month are paid during the following January will be treated for tax purposes as paid in December.

TAXATION

The tax information set forth in the Prospectus and the information in this section relates solely to Federal income tax law and assumes that each Fund qualifies as a regulated investment company (as discussed below). Such information is only a summary of certain key Federal income tax considerations affecting a Fund and its shareholders and is in addition to the information provided in the Prospectus. No attempt has been made to present a complete explanation of the Federal tax treatment of a Fund or the tax implications to shareholders. The discussions here and in the Prospectus are not intended as substitutes for careful tax planning. The Funds do not consider tax consequences to be of primary importance in making investment decisions. You may receive taxable distributions from a Fund during periods in which the share price has declined.

This "Taxation" section is based on the Code and applicable regulations in effect on the date of the Prospectus. Future legislative or administrative changes or court decisions may significantly change the tax rules applicable to the Fund and its shareholders. Any of these changes or court decisions may have a retroactive effect.

All investors should consult their own tax advisors as to the Federal, state, local and foreign tax consequences of an investment in a Fund.

Qualification as a Regulated Investment Company

Each Fund intends, for each tax year, to qualify as a "regulated investment company" under the Code.

Federal Income Tax Consequences of Qualification

As a regulated investment company, a Fund will not be subject to Federal income tax on the portion of its investment company taxable income (that is, taxable interest, dividends, net short-term capital gains and other taxable ordinary income, net of expenses) and net capital gain (that is, the excess of net long-term

capital gains over net short-term capital losses) that it distributes to shareholders. In order to qualify to be taxed as a regulated investment company, generally a Fund must satisfy the following requirements:

- A Fund must distribute at least 90% of its investment company taxable income and 90% of its net tax-exempt interest, if any, each tax year (certain distributions made by the Fund after the close of its tax year are considered distributions attributable to the previous tax year for purposes of satisfying this requirement (“Distribution Requirement”).
- A Fund must derive at least 90% of its gross income each year from dividends, interest, payments with respect to securities loans, and gains from the sale or other disposition of securities, or other income (including gains from options and futures contracts) derived from its business of investing in securities and net income derived from interests in qualified publicly traded partnerships.
- A Fund must satisfy the following asset diversification test at the close of each quarter of the Fund’s tax year: (1) at least 50% of the value of the Fund’s assets must consist of cash, cash items, U.S. Government securities, securities of other regulated investment companies, and securities of other issuers (as to which the Fund has not invested more than 5% of the value of the Fund’s total assets in securities of an issuer and as to which the Fund does not hold more than 10% of the outstanding voting securities of the issuer); and (2) no more than 25% of the value of the Fund’s total assets may be invested in the securities of any one issuer (other than U.S. Government securities and securities of other regulated investment companies), or in two or more issuers which the Fund controls and which are engaged in the same or similar trades or businesses or in the securities of one or more qualified publicly traded partnerships.

While each Fund presently intends to make cash distributions (including distributions reinvested in Fund shares) for each tax year in an aggregate amount sufficient to satisfy the Distribution Requirement and eliminate Federal income tax, a Fund may use “equalization accounting” (in lieu of making some or all cash distributions) for those purposes. A Fund that uses equalization accounting will allocate a portion of its undistributed investment company taxable income and net capital gain to redemptions of Fund shares and will correspondingly reduce the amount of such income and gain that it distributes in cash. If the IRS determines that a Fund’s allocation is improper and that the Fund has under-distributed its income and gain for any tax year, the Fund may be liable for Federal income and/or excise tax, and, if the Distribution Requirement has not been met, may also be unable to continue to qualify for treatment as a regulated investment company (see discussion below on what happens if a Fund fails to qualify for that treatment).

Failure to Qualify

If for any tax year a Fund does not qualify as a regulated investment company, all of its taxable income (including its net capital gain) will be subject to tax at regular corporate rates without any deduction for dividends paid to shareholders, and the dividends will be taxable to the shareholders as ordinary income to the extent of the Fund’s current and accumulated earnings and profits.

Failure to qualify as a regulated investment company would thus have a negative impact on a Fund’s income and performance. It is possible that a Fund will not qualify as a regulated investment company in any given tax year.

Fund Distributions

Each Fund anticipates distributing substantially all of its investment company taxable income for each tax year. These distributions are taxable to you as ordinary income.

Each Fund anticipates distributing substantially all of its net capital gain for each tax year. Distributions for the Credit Opportunities Fund generally are made quarterly, usually in March, June, September and December, but the Fund may make additional distributions of net capital gain at any time during the year. Distributions for the High Yield Fund, Low Duration Fund and Floating Rate Fund are made at least monthly. These distributions are taxable to you as long-term capital gain, regardless of how long you have held shares. These distributions do not qualify for the dividends-received deduction.

The Funds will operate on a fiscal, and therefore taxable, year ending December 31 of each year.

Distributions by a Fund that do not constitute ordinary income dividends or capital gain dividends will be treated as a return of capital. Return of capital distributions reduce your tax basis in the shares and are treated as gain from the sale of the shares to the extent of distributions after your basis has been reduced to zero.

All distributions by a Fund will be treated in the manner described above regardless of whether the distribution is paid in cash or reinvested in additional shares of the Fund (or of another fund). If you receive distributions in the form of additional shares, you will be treated as receiving a distribution in an amount equal to the fair market value of the shares received, determined as of the reinvestment date.

You may purchase shares with an NAV at the time of purchase that reflects undistributed net investment income or recognized capital gain, or unrealized appreciation in the value of the assets of a Fund. Distributions of these amounts are taxable to you in the manner described above, although the distribution economically constitutes a return of capital to you.

Ordinarily, you are required to take distributions by a Fund into account in the year in which they are made. A distribution declared in October, November or December of any year and payable to shareholders of record on a specified date in those months, however, is deemed to be paid by the Fund and received by you on December 31 of that calendar year if the distribution is actually paid in January of the following year.

Each Fund will send you information annually as to the Federal income tax consequences of distributions made (or deemed made) during the year.

Certain Tax Rules Applicable to the Funds' Transactions

For Federal income tax purposes, when put and call options purchased by a Fund expire unexercised, the premiums paid by the Fund give rise to short- or long-term capital losses at the time of expiration (depending on the length of the respective exercise periods for the options). When put and call options written by a Fund expire unexercised, the premiums received by the Fund give rise to short-term capital gains at the time of expiration. When a Fund exercises a call, the purchase price of the underlying security is increased by the amount of the premium paid by the Fund. When a Fund exercises a put, the proceeds from the sale of the underlying security are decreased by the premium paid. When a put or call written by a Fund is exercised, the purchase price (selling price in the case of a call) of the underlying security is decreased (increased in the case of a call) for tax purposes by the premium received.

Certain listed options, regulated futures contracts and forward currency contracts are considered "Section 1256 contracts" for Federal income tax purposes. Section 1256 contracts held by a Fund at the end of each tax year are "marked to market" and treated for Federal income tax purposes as though sold for fair market value on the last business day of the tax year. Gains or losses realized by a Fund on Section 1256 contracts generally are considered 60% long-term and 40% short-term capital gains or losses. A Fund can elect to exempt its Section 1256 contracts that are part of a "mixed straddle" (as described below) from the application of Section 1256.

Any option, futures contract or other position entered into or held by a Fund in conjunction with any other position held by the Fund may constitute a “straddle” for Federal income tax purposes. A straddle of which at least one, but not all, the positions are Section 1256 contracts, may constitute a “mixed straddle.” In general, straddles are subject to certain rules that may affect the character and timing of a Fund’s gains and losses with respect to straddle positions by requiring, among other things, that: (1) the loss realized on disposition of one position of a straddle may not be recognized to the extent that the Fund has unrealized gains with respect to the other position in such straddle; (2) the Fund’s holding period in straddle positions be suspended while the straddle exists (possibly resulting in a gain being treated as short-term capital gain rather than long-term capital gain); (3) the losses recognized with respect to certain straddle positions which are part of a mixed straddle and which are non-Section 1256 contracts be treated as 60% long-term and 40% short-term capital loss; (4) losses recognized with respect to certain straddle positions which would otherwise constitute short-term capital losses be treated as long-term capital losses; and (5) the deduction of interest and carrying charges attributable to certain straddle positions may be deferred. Various elections are available to a Fund, which may mitigate the effects of the straddle rules, particularly with respect to mixed straddles. In general, the straddle rules described above do not apply to any straddles held by a Fund if all of the offsetting positions consist of Section 1256 contracts.

Under the Code, gains or losses attributable to fluctuations in exchange rates which occur between the time a Fund accrues interest or other receivables or accrues expenses or other liabilities denominated in a foreign currency and the time the Fund actually collects such receivables or pays such liabilities are treated as ordinary income or ordinary loss. Similarly, gains or losses from the disposition of foreign currencies, from the disposition of debt securities denominated in a foreign currency, or from the disposition of a forward contract denominated in a foreign currency which are attributable to fluctuations in the value of the foreign currency between the date of acquisition of the asset and the date of disposition also are treated as ordinary income or loss. These gains or losses, referred to under the Code as “Section 988” gains or losses, increase or decrease the amount of the Fund’s investment company taxable income available to be distributed to its shareholders as ordinary income, rather than increasing or decreasing the amount of the Fund’s net capital gain.

Federal Excise Tax

A 4% nondeductible excise tax is imposed on a regulated investment company that fails to distribute in each calendar year an amount equal to: (1) 98% of its ordinary taxable income for the calendar year; and (2) 98.2% of its capital gain net income for the one-year period ended on October 31 of the calendar year. The balance of each Fund’s income must be distributed during the next calendar year. A Fund will be treated as having distributed any amount on which it is subject to income tax for any tax year ending in the calendar year.

For purposes of calculating the excise tax, a Fund: (1) reduces its capital gain net income (but not below its net capital gain) by the amount of any net ordinary loss for the calendar year; and (2) excludes foreign currency gains and losses incurred after October 31 of any year in determining the amount of ordinary taxable income for the current calendar year. A Fund will include foreign currency gains and losses incurred after October 31 in determining ordinary taxable income for the succeeding calendar year.

Each Fund intends to make sufficient distributions of its ordinary taxable income and capital gain net income prior to the end of each calendar year to avoid liability for the excise tax. Investors should note, however, that a Fund might in certain circumstances be required to liquidate portfolio investments to make sufficient distributions to avoid excise tax liability.

Sale, Exchange or Redemption of Shares

In general, you will recognize gain or loss on the sale, exchange or redemption of shares of a Fund in an amount equal to the difference between the proceeds of the sale, exchange or redemption and your adjusted tax basis in the shares. All or a portion of any loss so recognized may be disallowed if you purchase (for example, by reinvesting dividends) Fund shares within 30 days before or after the sale, exchange or redemption (a “wash sale”). If disallowed, the loss will be reflected in an upward adjustment to the basis of the shares purchased. In general, any gain or loss arising from the sale, exchange or redemption of shares of a Fund will be considered capital gain or loss and will be long-term capital gain or loss if the shares were held for longer than one year. Any capital loss arising from the sale, exchange or redemption of shares held for six months or less, however, will be treated as a long-term capital loss to the extent of the amount of distributions of net capital gain received on such shares. In determining the holding period of such shares for this purpose, any period during which your risk of loss is offset by means of options, short sales or similar transactions is not counted. Capital losses in any year are deductible only to the extent of capital gains plus, in the case of a non-corporate taxpayer, \$3,000 of ordinary income.

Backup Withholding

A Fund will be required in certain cases to withhold and remit to the U.S. Treasury at a rate under current law of 24% of distributions and the proceeds of redemptions of shares paid to you if you: (1) have failed to provide your correct taxpayer identification number; (2) are otherwise subject to backup withholding by the IRS for failure to report the receipt of interest or dividend income properly; or (3) have failed to certify to the Fund that you are not subject to backup withholding or that you are a corporation or other “exempt recipient.” Backup withholding is not an additional tax; rather any amounts so withheld may be credited against your Federal income tax liability or refunded if proper documentation is provided.

State and Local Taxes

The tax rules of the various states of the U.S. and their local jurisdictions with respect to an investment in a Fund can differ from the Federal income taxation rules described above. These state and local rules are not discussed herein. You are urged to consult your tax advisor as to the consequences of state and local tax rules with respect to an investment in the Fund.

Foreign Income Tax

Investment income received by a Fund from sources within foreign countries may be subject to foreign income taxes withheld at the source. The United States has entered into tax treaties with many foreign countries that may entitle the Fund to a reduced rate of such taxes or exemption from taxes on such income. It is impossible to know the effective rate of foreign tax in advance since the amount of a Fund’s assets to be invested within various countries cannot be determined. If more than 50% of the value of a Fund's total assets at the close of its taxable year consists of stocks or securities of foreign corporations, the Fund will be eligible and intends to file an election with the IRS to pass through to its shareholders the amount of foreign taxes paid by the Fund subject to certain exceptions. However, there can be no assurance that a Fund will be able to do so. Pursuant to this election, you will be required to (1) include in gross income (in addition to taxable dividends actually received) your pro rata share of foreign taxes paid by the Fund, (2) treat your pro rata share of such foreign taxes as having been paid by you and (3) either deduct such pro rata share of foreign taxes in computing your taxable income or treat such foreign taxes as a credit against Federal income taxes. You may be subject to rules which limit or reduce your ability to fully deduct, or claim a credit for, your pro rata share of the foreign taxes paid by the Fund.

The Foreign Account Tax Compliance Act (“FATCA”).

A 30% withholding tax on a Fund’s distributions, including capital gains distributions, and on gross proceeds from the sale or other disposition of shares of a Fund generally applies if paid to a foreign entity unless: (i) if the foreign entity is a “foreign financial institution,” it undertakes certain due diligence, reporting, withholding and certification obligations, (ii) if the foreign entity is not a “foreign financial institution,” it identifies certain of its U.S. investors or (iii) the foreign entity is otherwise excepted under FATCA. If applicable, and subject to any intergovernmental agreement, withholding under FATCA is required: (i) generally with respect to distributions from the Funds; and (ii) with respect to certain capital gains distributions and gross proceeds from a sale or disposition of Fund shares that occur on or after January 1, 2019. If withholding is required under FATCA on a payment related to your shares, investors that otherwise would not be subject to withholding (or that otherwise would be entitled to a reduced rate of withholding) on such payment generally will be required to seek a refund or credit from the IRS to obtain the benefits of such exemption or reduction. The Funds will not pay any additional amounts in respect to amounts withheld under FATCA. You should consult your tax advisor regarding the effect of FATCA based on your individual circumstances.

OTHER MATTERS

Control Persons and Principal Shareholders

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Funds. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a Fund or acknowledges the existence of control.

As of April 3, 2018, there were no control persons or principal shareholders of the Muzinich High Income Floating Rate Fund. As of April 3, 2018, the following shareholders were considered to be either a control person or principal shareholder of the following Funds:

As of March 31, 2018, the Trustees and Officers as a group did not own more than 1% of the outstanding shares of the Funds.

Proxy Voting Procedures

The Board has adopted Proxy Voting Policies and Procedures (the “Policies”) on behalf of the Trust which delegate the responsibility for voting proxies to the Advisor, subject to the Board’s continuing oversight. The Policies require that the Advisor vote proxies received in a manner consistent with the best interests of the Funds and their shareholders. The Policies also require the Advisor to present to the Board, at least annually, the Advisor’s Proxy Policies (as defined below) and a record of each proxy voted by the Advisor on behalf of the Funds, including a report on the resolution of all proxies identified by the Advisor as involving a conflict of interest. The Advisor has also adopted Proxy Voting Policies and Procedures (“Advisor’s Proxy Policies”) which are attached as Appendix B to this SAI.

The Trust will file a Form N-PX, with each Fund’s complete proxy voting record for the 12 months ended June 30, no later than August 31st of each year. Form N-PX for the Funds will be available without charge, upon request, by calling toll-free 1-855-MUZINICH and on the SEC’s website at www.sec.gov.

Code of Ethics

The Trust, the Advisor and the Distributor have each adopted a code of ethics under Rule 17j-1 of the 1940 Act which are designed to eliminate conflicts of interest between the Funds and personnel of the Trust, the Advisor and the Distributor. The codes permit such personnel to invest in securities, including securities that may be purchased or held by the Funds, subject to certain limitations.

Registration Statement

This SAI and the Prospectus do not contain all the information included in the Trust’s registration statement filed with the SEC under the 1933 Act with respect to the securities offered hereby. The registration statement, including the exhibits filed therewith, may be examined at the office of the SEC in Washington, D.C.

Statements contained herein and in the Prospectus as to the contents of any contract or other documents are not necessarily complete, and, in each instance, are qualified by, reference to the copy of such contract or other documents filed as exhibits to the registration statement.

Distributor

Distribution Services

Quasar Distributors, LLC, 777 East Wisconsin Avenue, Milwaukee, Wisconsin 53202 (“Quasar”), serves as the Fund’s principal underwriter in a continuous public offering of the Fund’s shares. Pursuant to a distribution agreement between the Fund and Quasar (the “Distribution Agreement”), Quasar acts as the Fund’s principal underwriter and distributor and provides certain administration services and promotes and arranges for the sale of the Fund’s shares. Quasar is a registered broker-dealer under the Securities Exchange Act of 1934, as amended, and is a member of the Financial Industry Regulatory Authority (“FINRA”).

The Distribution Agreement between each Fund and Quasar will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund’s outstanding voting securities and, in either case, by a majority of the Independent Trustees. The Distribution Agreement is terminable without penalty by the Trust on behalf of the Fund on a 60-day written notice when authorized

either by a majority vote of the Fund's shareholders or by vote of a majority of the Board, including a majority of the Independent Trustees, or by Quasar on a 60-day written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act).

Distribution Plan – (Class A Shares)

The Funds have adopted a Distribution Plan ("The Plan") pursuant to Rule 12b-1 under the 1940 Act under which each Fund's Class A shares pays the Distributor an amount which is accrued daily and paid quarterly, at an annual rate of 0.25% of the average daily net assets of a Fund. Amounts paid under the Plan, by each Fund, are paid to the Distributor to compensate broker-dealers and service providers that provide distribution-related services to the Class A Shares for the costs of the services provided and the expenses borne in the distribution of a Fund's Shares, including overhead and telephone expenses; printing and distribution of prospectuses and reports used in connection with the offering of a Fund's shares to prospective investors; and preparation, printing and distribution of sales literature and advertising materials. The services provided by selected dealers pursuant to the Plan are primarily designed to promote the sale of shares of a Fund and include the furnishing of office space and equipment, telephone facilities, personnel and assistance to a Fund in servicing such shareholders. The services provided by the administrators pursuant to the Plan are designed to provide support services to a Fund and include establishing and maintaining shareholders' accounts and records, processing purchase and redemption transactions, answering routine client inquiries regarding a Fund and providing other services to a Fund as may be required.

The Distribution Fee is payable to the Distributor regardless of the distribution-related expenses actually incurred. Because the Distribution Fee is not directly tied to expenses, the amount of distribution fees paid by the Advisor shares of a Fund during any year may be more or less than actual expenses incurred pursuant to the 12b-1 Plan. For this reason, this type of distribution fee arrangement is characterized by the staff of the SEC as a "compensation" plan.

The Distributor may use the Distribution Fee to pay for services covered by the 12b-1 Plan including, but not limited to, advertising, compensating underwriters, dealers and selling personnel engaged in the distribution of Fund shares, the printing and mailing of prospectuses, statements of additional information and reports, the printing and mailing of sales literature pertaining to the Funds, and obtaining whatever information, analyses and reports with respect to marketing and promotional activities that the Funds may, from time to time, deem advisable.

The 12b-1 Plan provides that it will continue from year to year upon approval by the majority vote of the Board, including a majority of the trustees who are not "interested persons" of the Funds, as defined in the 1940 Act, and who have no direct or indirect financial interest in the operations of the 12b-1 Plan or in any agreement related to such plan (the "Qualified Trustees"), as required by the 1940 Act, currently cast in person at a meeting called for that purpose, provided that such trustees have made a determination that there is a reasonable likelihood that the 12b-1 Plan will benefit the Fund and its shareholders. It is also required that the trustees who are not "interested persons" of the Funds, select and nominate all other trustees who are not "interested persons" of the Funds. The 12b-1 Plan and any related agreements may not be amended to materially increase the amounts to be spent for distribution expenses without approval of shareholders holding a majority of the Fund shares outstanding. All material amendments to the 12b-1 Plan or any related agreements must be approved by a vote of a majority of the Board and the Qualified Trustees, cast in person at a meeting called for the purpose of voting on any such amendment.

The 12b-1 Plan requires that the Distributor provide to the Board, at least quarterly, a written report on the amounts and purpose of any payment made under the 12b-1 Plan. The Distributor is also required to furnish the Board with such other information as may reasonably be requested in order to enable the Board to make an informed determination of whether the 12b-1 Plan should be continued.

As noted above, the 12b-1 Plan provides for the ability to use Fund assets to pay financial intermediaries (including those that sponsor mutual fund supermarkets), plan administrators and other service providers to finance any activity that is principally intended to result in the sale of Fund shares (distribution services) and for the provision of personal services to shareholders. The payments made by the Funds to financial intermediaries are based primarily on the dollar amount of assets invested in the Funds through the financial intermediaries. These financial intermediaries may pay a portion of the payments that they receive from the Fund to their investment professionals. In addition to the ongoing asset-based fees paid to these financial intermediaries under the Funds' 12b-1 Plan, the Funds may, from time to time, make payments under the 12b-1 Plan that help defray the expenses incurred by these intermediaries for conducting training and educational meetings about various aspects of the Funds for their employees. In addition, the Funds may make payments under the 12b-1 Plan for exhibition space and otherwise help defray the expenses these financial intermediaries incur in hosting client seminars where the Funds are discussed.

In addition, the Funds may participate in various "fund supermarkets" in which a mutual fund supermarket sponsor (usually a broker-dealer) offers many mutual funds to the sponsor's customers without charging the customers a sales charge. In connection with its participation in such platforms, the Distributor may use all or a portion of the Distribution Fee to pay one or more supermarket sponsors a negotiated fee for distributing the Funds' shares. In addition, in its discretion, the Advisor may pay additional fees to such intermediaries from its own assets.

The table below shows the 12b-1 payments paid by the Class A shares of the Credit Opportunities Fund pursuant to the Plan for the fiscal period ended December 31, 2017.

12b-1 Payments Paid
\$526

Of this amount, payments were made for the following activities:

Advertising and Marketing	Printing and Postage	Payment to Distributor	Payment to Dealers	Compensation to Sales Personnel	Other Expenses (Travel)	Interest, carrying or other financing charges
\$0	\$0	\$0	\$0	\$526	\$0	\$0

Shareholder Servicing Plan – (Class A Shares and Institutional Shares)

Pursuant to a Shareholder Service Plan (the "Plan") adopted by the Trust and established by the Funds with respect to the Class A shares and Institutional Class shares of the Funds, the Advisor is authorized to provide, or arrange for others to provide, personal shareholder services relating to the servicing and maintenance of shareholder accounts not otherwise provided to the Funds ("Shareholder Servicing Activities"). Under the Plan, the Advisor may enter into shareholder service agreements with securities broker-dealers and other securities professionals ("Service Organizations") who provide Shareholder Servicing Activities for their clients invested in the Funds.

Shareholder Servicing Activities shall include one or more of the following: (1) establishing and maintaining accounts and records relating for shareholders of the Funds; (2) aggregating and processing orders involving the shares of the Funds; (3) processing dividend and other distribution payments from the Funds on behalf of shareholders; (4) providing information to shareholders as to their ownership of Fund shares or about other aspects of the operations of the Funds; (5) preparing tax reports or forms on behalf of shareholders; (6) forwarding communications from the Funds to shareholders; (7) assisting shareholders in

changing the Funds’ records as to their addresses, dividend options, account registrations or other data; (8) providing sub-accounting with respect to shares beneficially owned by shareholders, or the information to the Funds necessary for sub-accounting; (9) responding to shareholder inquiries relating to the services performed; (10) providing shareholders with a service that invests the assets of their accounts in shares pursuant to specific or pre-authorized instructions; and (11) providing such other similar services as the Advisor may reasonably request to the extent the Service Organization is permitted to do so under applicable statutes, rules or regulations.

As compensation for the Shareholder Servicing Activities, each Fund pays the Advisor a fee of up to 0.10% annually of each Fund’s Class A shares’ and Institutional Class shares’ average daily net assets of the shares owned by investors for which the shareholder servicing agent maintains a servicing relationship or \$22 per account.

Any material amendment to the Plan must be approved by the Board, including a majority of the Independent Trustees, or by a vote of a “majority” (as defined in the 1940 Act) of the outstanding voting securities of the applicable class or classes. The Plan may be terminated, with respect to a class or classes of the Funds, without penalty at any time: (1) by vote of a majority of the Board, including a majority of the Independent Trustees; or (2) by a vote of a “majority” (as defined in the 1940 Act) of the outstanding voting securities of the applicable class or classes.

The Credit Opportunities Fund paid the following amounts in Plan fees for the periods ended December 31 shown below:

	2017	2016	2015
Shareholder Servicing Plan Fees Paid	\$85,581	\$13,367	\$453

Marketing, Support and Other Payments

The Advisor, out of its own resources and without additional cost to the Fund or its shareholders, may provide additional cash payments or other compensation to certain Financial Intermediaries who sell shares of the Fund or provide shareholder servicing to their customers holding shares of the Fund.

The prospect of receiving, or the receipt of additional payments or other compensation as described below by Financial Intermediaries, may provide such intermediaries and/or their salespersons with an incentive to favor sales of shares of the Fund, and other mutual funds whose affiliates make similar compensation available, over sale of shares of mutual funds (or non-mutual fund investments) not making such payments. You may wish to take such payment arrangements into account when considering and evaluating any recommendations relating to the Fund shares.

These payments may be divided into categories as follows:

Support Payments.

Payments may be made by the Advisor to certain Financial Intermediaries in connection with the eligibility of the Fund to be offered in certain programs and/or in connection with meetings between the Fund’s representatives and Financial Intermediaries and their sales representatives. Such meetings may be held for various purposes, including providing education and training about the Fund and other general financial topics to assist Financial Intermediaries’ sales representatives in making informed recommendations to, and decisions on behalf of, their clients.

Entertainment, Conferences, and Events.

The Advisor also may pay cash or non-cash compensation to sales representatives of Financial Intermediaries in the form of: (1) occasional gifts; (2) occasional meals, tickets, or other entertainments; and/or (3) sponsorship support for the Financial Intermediary's client seminars and cooperative advertising. In addition, the Advisor pays for exhibit space or sponsorships at regional or national events of Financial Intermediaries.

Shareholder Servicing.

Many Fund shares are owned by Financial Intermediaries for the benefit of their customers. In those cases, the Fund may not maintain an account for the shareholder. Thus, some or all of the transfer agency and administrative functions for these accounts are performed by the Financial Intermediaries. A portion of the fees charged by the Financial Intermediaries for these services is paid out of the Advisor's revenues. These amounts include, but are not necessarily limited to, fees for shareholder servicing, sub-transfer agency, sub-accounting and recordkeeping services. The amounts paid by the Advisor do not include fees for shareholder servicing that may be paid separately by the Fund pursuant to the Fund's Distribution Plan and Shareholder Servicing Plan.

Financial Statements

The Funds' annual report to shareholders for the fiscal year ended December 31, 2017, is a separate document available without charge, upon request, by calling 1-855-MUZINICH or 1-855-689-4642 and the financial statements, accompanying notes and report of the independent registered public accounting firm appearing therein are incorporated by reference into this SAI.

Since the Muzinich High Income Floating Rate Fund had not commenced operations as of the date of this SAI, no financial statements are available.

APPENDIX A – DESCRIPTION OF SECURITIES RATINGS

A. Long-Term Ratings

1. Moody's Investors Service – Long-Term Corporate Obligation Ratings

Moody's long-term obligation ratings are opinions of the relative credit risk of fixed-income obligations with an original maturity of one year or more. They address the possibility that a financial obligation will not be honored as promised. Such ratings use Moody's Global Scale and reflect both the likelihood of default and any financial loss suffered in the event of default.

- Aaa** Obligations rated Aaa are judged to be of the highest quality, with minimal credit risk.
- Aa** Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.
- A** Obligations rated A are considered upper-medium grade and are subject to low credit risk.
- Baa** Obligations rated Baa are subject to moderate credit risk. They are considered medium grade and as such may possess certain speculative characteristics.
- Ba** Obligations rated Ba are judged to have speculative elements and are subject to substantial credit risk.
- B** Obligations rated B are considered speculative and are subject to high credit risk.
- Caa** Obligations rated Caa are judged to be of poor standing and are subject to very high credit risk.
- Ca** Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.
- C** Obligations rated C are the lowest rated class of bonds and are typically in default, with little prospect for recovery of principal or interest.

Note Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

2. Standard and Poor's – Long-Term Issue Credit Ratings (including Preferred Stock)

Issue credit ratings are based, in varying degrees, on the following considerations:

- Likelihood of payment—capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;
- Nature of and provisions of the obligation;
- Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

Issue ratings are an assessment of default risk, but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

AAA An obligation rated 'AAA' has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

Note Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC An obligation rated 'CC' is currently highly vulnerable to nonpayment.

C A 'C' rating is assigned to obligations that are currently highly vulnerable to nonpayment, obligations that have payment arrearages allowed by the terms of the documents, or obligations of an issuer that is the subject of a bankruptcy petition or similar action which have not experienced a payment default. Among others, the 'C' rating may be assigned to subordinated debt, preferred stock or other obligations on which cash payments have been suspended in accordance with the instrument's terms.

D An obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The

'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

Note Plus (+) or minus (-). The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

NR This indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that Standard & Poor's does not rate a particular obligation as a matter of policy.

3. Fitch – International Long-Term Credit Ratings

International Long-Term Credit Ratings (LTCR) may also be referred to as Long-Term Ratings. When assigned to most issuers, it is used as a benchmark measure of probability of default and is formally described as an Issuer Default Rating (IDR). The major exception is within Public Finance, where IDRs will not be assigned as market convention has always focused on timeliness and does not draw analytical distinctions between issuers and their underlying obligations. When applied to issues or securities, the LTCR may be higher or lower than the issuer rating (IDR) to reflect relative differences in recovery expectations.

The following rating scale applies to foreign currency and local currency ratings:

Investment Grade

- AAA** Highest credit quality. ‘AAA’ ratings denote the lowest expectation of credit risk. They are assigned only in case of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.
- AA** Very high credit quality. ‘AA’ ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
- A** High credit quality. ‘A’ ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to changes in circumstances or in economic conditions than is the case for higher ratings.
- BBB** Good credit quality. ‘BBB’ ratings indicate that there are currently expectations of low credit risk. The capacity for payment of financial commitments is considered adequate but adverse changes in circumstances and economic conditions are more likely to impair this capacity. This is the lowest investment grade category.

Speculative Grade

- BB** Speculative. ‘BB’ ratings indicate that there is a possibility of credit risk developing, particularly as the result of adverse economic change over time; however, business or financial alternatives may be available to allow financial commitments to be met. Securities rated in this category are not investment grade.
- B** Highly speculative. ‘B’ ratings indicate that significant credit risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.
- CCC** Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic conditions.
- CC** Default of some kind appears probable.
- C** Default is imminent.
- RD** Indicates an entity that has failed to make due payments (within the applicable grace period) on some but not all material financial obligations, but continues to honor other classes of obligations.
- D** Indicates an entity or sovereign that has defaulted on all of its financial obligations. Default generally is defined as one of the following:
 - Failure of an obligor to make timely payment of principal and/or interest under the contractual terms of any financial obligation;

- The bankruptcy filings, administration, receivership, liquidation or other winding-up or cessation of business of an obligor;
- The distressed or other coercive exchange of an obligation, where creditors were offered securities with diminished structural or economic terms compared with the existing obligation.

Default ratings are not assigned prospectively; within this context, non-payment on an instrument that contains a deferral feature or grace period will not be considered a default until after the expiration of the deferral or grace period.

Issuers will be rated 'D' upon a default. Defaulted and distressed obligations typically are rated along the continuum of 'C' to 'B' ratings categories, depending upon their recovery prospects and other relevant characteristics. Additionally, in structured finance transactions, where analysis indicates that an instrument is irrevocably impaired such that it is not expected to meet pay interest and/or principal in full in accordance with the terms of the obligation's documentation during the life of the transaction, but where no payment default in accordance with the terms of the documentation is imminent, the obligation may be rated in the 'B' or 'CCC-C' categories.

Default is determined by reference to the terms of the obligations' documentation. Fitch will assign default ratings where it has reasonably determined that payment has not been made on a material obligation in accordance with the requirements of the obligation's documentation, or where it believes that default ratings consistent with Fitch's published definition of default are the most appropriate ratings to assign.

Note The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' Long-term rating category, to categories below 'CCC', or to Short-term ratings other than 'F1'. (The +/- modifiers are only used to denote issues within the CCC category, whereas issuers are only rated CCC without the use of modifiers.)

B. Preferred Stock Ratings

1. Moody's Investors Service

Aaa An issue which is rated "Aaa" is considered to be a top-quality preferred stock. This rating indicates good asset protection and the least risk of dividend impairment within the universe of preferred stocks.

Aa An issue which is rated "Aa" is considered a high-grade preferred stock. This rating indicates that there is a reasonable assurance the earnings and asset protection will remain relatively well-maintained in the foreseeable future.

A An issue which is rated "A" is considered to be an upper-medium grade preferred stock. While risks are judged to be somewhat greater than in the "aaa" and "aa" classification, earnings and asset protection are, nevertheless, expected to be maintained at adequate levels.

Baa An issue which is rated "Baa" is considered to be a medium-grade preferred stock, neither highly protected nor poorly secured. Earnings and asset protection appear adequate at present but may be questionable over any great length of time.

Ba An issue which is rated "Ba" is considered to have speculative elements and its future cannot be considered well assured. Earnings and asset protection may be very moderate and not well safeguarded during adverse periods. Uncertainty of position characterizes preferred stocks in this class.

- B** An issue which is rated “B” generally lacks the characteristics of a desirable investment. Assurance of dividend payments and maintenance of other terms of the issue over any long period of time may be small.
 - Caa** An issue which is rated “Caa” is likely to be in arrears on dividend payments. This rating designation does not purport to indicate the future status of payments.
 - Ca** An issue which is rated “Ca” is speculative in a high degree and is likely to be in arrears on dividends with little likelihood of eventual payments.
 - C** This is the lowest rated class of preferred or preference stock. Issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.
- Note** Moody’s applies numerical modifiers 1, 2, and 3 in each rating classification; The modifier 1 indicates that the security ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking and the modifier 3 indicates that the issue ranks in the lower end of its generic rating category.

C. Short Term Ratings

1. Moody’s Investors Service

Moody’s short-term ratings are opinions of the ability of issuers to honor short-term financial obligations. Ratings may be assigned to issuers, short-term programs or to individual short-term debt instruments. Such obligations generally have an original maturity not exceeding thirteen months, unless explicitly noted.

Moody’s employs the following designations to indicate the relative repayment ability of rated issuers:

- P-1** Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.
- P-2** Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.
- P-3** Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term debt obligations.
- NP** Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Note Canadian issuers rated P-1 or P-2 have their short-term ratings enhanced by the senior-most long-term rating of the issuer, its guarantor or support-provider.

2. Standard and Poor’s

- A-1** A short-term obligation rated ‘A-1’ is rated in the highest category by Standard & Poor’s. The obligor’s capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

- A-2** A short-term obligation rated ‘A-2’ is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitment on the obligation is satisfactory.
- A-3** A short-term obligation rated ‘A-3’ exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.
- B** A short-term obligation rated ‘B’ is regarded as having significant speculative characteristics. Ratings of ‘B-1’, ‘B-2’, and ‘B-3’ may be assigned to indicate finer distinctions within the ‘B’ category. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties which could lead to the obligor’s inadequate capacity to meet its financial commitment on the obligation.
- B-1** A short-term obligation rated ‘B-1’ is regarded as having significant speculative characteristics, but the obligor has a relatively stronger capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.
- B-2** A short-term obligation rated ‘B-2’ is regarded as having significant speculative characteristics, and the obligor has an average speculative-grade capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.
- B-3** A short-term obligation rated ‘B-3’ is regarded as having significant speculative characteristics, and the obligor has a relatively weaker capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.
- C** A short-term obligation rated ‘C’ is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.
- D** A short-term obligation rated ‘D’ is in payment default. The ‘D’ rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor’s believes that such payments will be made during such grace period. The ‘D’ rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.
- Note** Dual Ratings. Standard & Poor’s assigns “dual” ratings to all debt issues that have a put option or demand feature as part of their structure. The first rating addresses the likelihood of repayment of principal and interest as due, and the second rating addresses only the demand feature. The long-term rating symbols are used for bonds to denote the long-term maturity and the short-term rating symbols for the put option (for example, ‘AAA/A-1+’). With U.S. municipal short-term demand debt, note rating symbols are used with the short-term issue credit rating symbols (for example, ‘SP-1+/A-1+’).

3. Fitch

The following ratings scale applies to foreign currency and local currency ratings. A Short-term rating has a time horizon of less than 13 months for most obligations, or up to three years for US public finance, in line with industry standards, to reflect unique risk characteristics of bond, tax, and revenue anticipation notes that are commonly issued with terms up to three years. Short-term ratings thus place greater emphasis on the liquidity necessary to meet financial commitments in a timely manner.

- F1** Highest credit quality. Indicates the strongest capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.
- F2** Good credit quality. A satisfactory capacity for timely payment of financial commitments, but the margin of safety is not as great as in the case of the higher ratings.
- F3** Fair credit quality. The capacity for timely payment of financial commitments is adequate; however, near term adverse changes could result in a reduction to non investment grade.
- B** Speculative. Minimal capacity for timely payment of financial commitments, plus vulnerability to near term adverse changes in financial and economic conditions.
- C** High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon a sustained, favorable business and economic environment.
- D** Indicates an entity or sovereign that has defaulted on all of its financial obligations.
- Note** The modifiers “+” or “-” may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the ‘AAA’ Long-term rating category, to categories below ‘CCC’, or to Short-term ratings other than ‘F1’. (The +/- modifiers are only used to denote issues within the CCC category, whereas issuers are only rated CCC without the use of modifiers.)

APPENDIX B – ADVISOR PROXY VOTING POLICIES AND PROCEDURES

Muzinich & Co., Inc. Proxy Voting Policy Summary

The Firm will accept discretionary authority over a client's proxy if the Firm has discretionary authority over the client's advisory account and the advisory contract does not expressly state that the Firm will not be voting proxies or the client does not retain voting authority. The Deputy COO or a designated supervisor ("voting officer") has been delegated the authority for monitoring corporate actions, obtaining voting decisions from portfolio managers in accordance with these policies, and ensuring that proxies are submitted in a timely manner. The voting officer will also be responsible for ensuring that clients' requests for these proxy voting policies and procedures and/or their voting information is responded to effectively within a prompt time period. The Firm may utilize a third party service provider to assist in proxy voting matters.

In voting proxies, the Firm will vote in accordance with the standards provided by the NYSE Shareholder Standards, Institutional Shareholder Services and with the best interests of the client account and in light of the purposes for which each individual account was created. The Firm will generally support the management nominees of the issuer, because the existing management typically knows the individuals best to lead it. The review of long-term and short-term advantages will be weighed when making voting decisions.

Support will be given for proposals that support shareholder rights and increase management accountability to shareholders without sacrificing management's flexibility. The Firm may vote against measures that put the shareholder's rights at risk.

The Firm will review social issue proposals and vote those proxies consistent with the investment objectives or guidelines of the client's portfolio.

For those accounts for which the Firm is authorized to vote proxies, the Firm will record the date proxies are voted, and those not voted will be specified with the underlying reason. Each item to be voted on should be voted separately and individually, not voted in blank.

The voting officer is responsible for ensuring that the following proxy records are maintained for 6 (six) years, the first two in an appropriate office of the Firm:

- Records of proxy statements received regarding client securities;
- Records of each vote cast by the Firm on behalf of a client;
- Copies of any document created by the Firm that was material to making a decision on voting clients' securities;
- Records of all communications received and internal documents created that were material to the voting decision; and
- Each written client request for proxy voting information and the Firm's written response to such client request (written or oral) for proxy voting information.

If the Firm utilizes a third party service provider for proxy voting, the Firm will rely on the provider to maintain proxy statements and records of proxy votes cast. The Firm will obtain an undertaking from the third party to provide a copy of the documents promptly upon request.

When proxy statements are received the voting officer will determine whether such company issuing the proxy has such a relationship with the Firm or its affiliates that it may, or may be perceived, to give rise to a conflict of interest between the Firm and its clients. Examples of such a relationship include:

- Companies affiliated with directors, or immediate family members of directors of the Firm or of affiliates of the Firm;
- Companies affiliated with officers, or immediate family members of officers of the Firm or of affiliates of the Firm; and
- Companies that maintain significant business relationships with the Firm or of affiliates of the Firm, or with which the Firm or an affiliate of the Firm is actively seeking a significant business relationship.

In addition, any proxy vote that would result in increased compensation to the Firm or an affiliate due to increased or additional fees or other charges to be paid by the client as a result would also be considered a vote where the Firm has a conflict of interest. The voting officer with consultation of the CCO will determine, based on a review of the issues raised by the conflict of interest, the nature of the potential conflict and, most importantly, given the Firm's commitment to vote proxies in the best interests of client accounts, how the proxy will be handled. The voting officer will perform one the following duties as a result:

- Vote the proxy in accordance with the Firm's proxy policies;
- Disclose the conflict to the client(s), providing sufficient information regarding the matter and the nature of the Firm's conflict, and obtaining consent before voting;
- Employ an outside service provider to advise in the voting of the proxy;
- Employ an outside service provider to vote the proxy on behalf of the Firm and its clients; or
- Decline to vote the proxy because the cost of addressing the potential conflict of interest is greater than the benefit to the clients of voting the proxy.

The voting officer will document all instances where a proxy involved a conflict of interest, including the nature and the circumstances of the conflict, the steps taken by the Firm to resolve the conflict of interest, and the vote(s) as a result.

Investment Firm Proxy Voting -Form N-PX

Form N-PX is to be used by a registered management investment company , other than a small business investment company registered on Form N-5 (§§ 239.24 and 274.5 of this chapter), to file reports with the Commission, not later than August 31 of each year, containing the registrant's proxy voting record for the most recent twelve-month period ended June 30, pursuant to section 30 of the Investment Company Act of 1940 and rule 30b1-4 there under (17 CFR 270.30b1-4).

The CCO of the Firm shall collect the appropriate information for the completion of Form N- PX and shall work with the administrator or other appropriate persons with respect to investment companies for which it is the Advisor to prepare and file the Form on behalf of the investment company.
